## Soybean (ZS) Daily MACD Trying to Positively Cross

Soybean (ZS) is going into the new week's European morning gravitating towards the psychologically key 900 whole figure level. Significantly, although ZS remains within a triangle (on the 4hr and daily chart), a daily close above this triangle's resistance this week will likely coincide with a retest of the July high and the 50% Fib retrace of the January to April slide. Any retest of the 61.8% Fib will have to wait until at least after the WASDE on Aug 12. The weekly, daily and 4hr RSI, Stochastics and MACD are rallying, bottomish or consolidating recent gains. I am looking to go long in the green zone (of the daily chart), and am targeting the red zone for Friday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

## Natural Gas (NG) Weekly/Daily/4hr

Natural Gas (NG) is rebounding roughly 3% to start the week after 2 days of post-storage losses. Significantly, NG is continuing efforts at a major trend reversal, with it edging in the past month across several descending wedge resistance lines (on the weekly chart). **Congratulations to Premium Members who profited from the opportunities highlighted April 1st, April 17th and on May 1st.** The weekly, daily and 4hr RSI, Stochastics and MACD are bottomish, rallying or consolidating recent gains. I am long as of Friday and today at a 1.864 average (although if I were flat I'd consider going long in the green zone of the daily chart), targeting the red zone for Friday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

**Today's Top 3 Trades** offers technical analysis on a subset of 3 CME/ICE commodity/index futures or spot FX markets (with coverage for 2 markets from a designated asset class(es) for each weekday as seen in the **Watchlist**), plus the top trade idea for the day from any asset class. All 3 markets covered are selected based on their likelihood to exhibit trend reversal or continuation during the week that begins on the day of coverage, based on technical analysis and news flow. For instance, Monday coverage is on 2 Agris (and potentially 1 Index), while Tuesdays are devoted to 2 Indices (and potentially 1 Soft).

**Equities & ETFs** has taken on a new format where it is now an Entries/Exits service inspired by technical analysis on a collection of equities and ETFs. The 25 equities and ETFs initially profiled for their beaten down, trend reversal potential, between April 17 to May 22, 2020, have mostly ran up tremendously since then, and are assumed to be closed trades as of June 10th using the day's opening price. **Congratulations to all Premium Members who profited from these long equity/ETF ideas soon after they were initially profiled.**

I will look to explore new long/short trade ideas on **Equities & ETFs** with **Premium Members** with a target of 5 multi-week to multi-month swing trades each month. **Premium Members** also have access to monthly and weekly chart technical analysis for 5 Equity/ETF markets each Saturday.

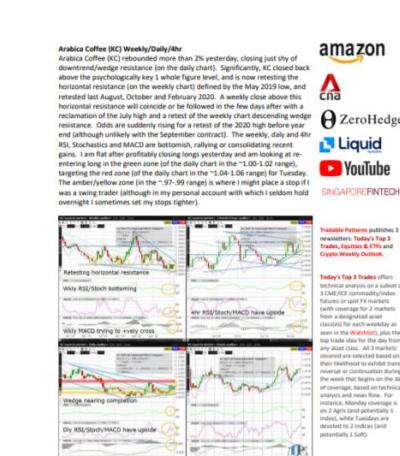

## Coffee Daily

Get your coffee today? You can now enjoy your brew with **Coffee Daily - Tradable Patterns' Arabica and Robusta Coffee Futures technical analysis newsletter**, published Monday to Friday before the London open. Write to [info@tradablepatterns.com](mailto:info@tradablepatterns.com) for pricing details and sample reports as of the July 13 launch, illustrating how the massive moves since were hinted through pattern recognition.

**Coffee Daily** is a technical analysis newsletter published weekdays on ICE Arabica & Robusta Coffee futures.

**Crypto Weekly Outlook** covers crypto industry fundamentals and technicals/fundamentals Sundays on Bitcoin, Ethereum and Ripple.

Tradable Patterns publishes 3 newsletters: Today's Top 3, Crypto Weekly Outlook and Crypto Weekly Review.

Today's Top 3: Tradable Patterns offers technical analysis on a subset of CFDs community/index options, futures and stocks (with coverage for 2 markets from the most liquid classes) for each weekday as seen in the *Weekchart*, plus the top 3 patterns for each asset in any class. All 3 markets are tracked for their likelihood to exhibit trend reversal patterns for the week that begins on the day before the publication of analysis and news. For instance, Monday coverage is at 3:00 PM UTC, Tuesday at 10:00 AM UTC, while Tuesdays are delayed by one hour (potentially 1:00).
