

TODAY'S TOP 3 TRADES

Feb 14, 2022

AGRIS (WHEAT, CORN) + TODAY'S TOP TRADE (GOLD)

WHEAT (ZW)

Wheat (ZW) opened the week decisively above the psychologically key 800 whole figure level. Significantly, ZW has halted a slide from the 2021 peak, and appears to be readying to resume the uptrend (on the weekly chart). Nevertheless, with ZW bumping up against upchannel resistance (on the 4hr chart), odds are high for at least a few days of consolidation just below and the January high. [Congratulations to Premium Members alerted Aug 21, 2020 to ZW's major bottoming effort and who benefited.](#) The weekly, daily and 4hr RSI, Stochastics and MACD are bottomish or rallying. I am looking to go long in the green zone (of the daily chart), targeting the red zone for Friday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

CORN (ZC)

Corn (ZC) is edging higher to start the week, trying to regain last Thursday's break to a fresh 2022 high (above the 2021 high). Significantly, although odds are moderate for ZC to extend its upchannel (on the daily chart) this week, and to resume its efforts on the continuous contract to reach its 2021 high, ZC is increasingly at risk of a deeper consolidation after the strong gains from the September 2021 low. [Congratulations to Premium Members who benefited from the May 28, 2020 alert to ZC's major bottoming effort](#) and again on [Aug 24, 2020](#). The weekly, daily and 4hr RSI, Stochastics and MACD are rallying, bottomish or consolidating recent gains. I'm looking to enter long in the green zone (of the daily chart), targeting the red zone for Friday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

Weekly/Daily/4hr

SINGAPOREFINTECH

GOLD (GC)

Gold (GC) is seeing some healthy profit-taking to start the week after Friday's strong gains. Significantly, GC may complete the weekly chart triangle as early as this week, given the slew of news beginning with FOMC Member Bullard comments at 11am EST, US PPI on Tuesday, and the US retail sales and FOMC Minutes Wednesday. Nevertheless, consolidation is in order with GC digesting Friday's break above the January high, and with GC bumping up against triangle resistance (on the weekly chart). By going to tradingview.com, GC can be seen breaking triangle resistance (connecting the 2020 and 2021 highs), and nearing triangle completion. The weekly, daily and 4hr RSI, Stochastics and MACD are bottomish, rallying or consolidating recent gains. I am flat after profitably closing longs Friday and am looking to re-enter long in the green zone (of the daily chart), targeting the red zone for Friday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

CRYPTO WEEKLY OUTLOOK

ETHEREUM + INDUSTRY FUNDAMENTALS + BITCOIN + RIPPLE

ETHEREUM (ETHUSD)

Nov 28, 2021

Ethereum (ETHUSD) is deepening in its correction, and appears poised to slide further this week. Significantly, ETHUSD is at high risk of exceeding the September pullback in magnitude, following in Bitcoin (BTCUSD)'s footsteps. The current 2 week downturn is testing the psychologically key 4k whole figure level, and appears to be gravitating towards an uptrend support line (on the weekly chart) connecting the July and September lows. Odds are elevated for a test of the 50% Fib retrace of the July to October rally sometime in December. ETHUSD's correlation to BTCUSD (on a weekly chart) is at 0.95, near the upper end of its 5 year range. [Congratulations to readers alerted August 1st of the completion of the major June-July bottom](#), and to those who heeded [the warning May 16th of the major top forming](#). The weekly RSI, Stochastics and MACD are tiring, weighing on the attempting to bottom daily RSI and Stochastics. I am likely going to remain flat this week but would consider going long in the 3000-3300 range, targeting a 3000-4000 range for December.

Robusta Coffee (RC) Weekly/Daily/4hr

Robusta Coffee (RC) consolidated again yesterday, forming a 2nd daily Doji/Gravestone and advancing in the weekly Gravestone just above the March low. Significantly, RC will need to close on a weekly basis above the 50% Fib retrace of the July to September rally to all but halt the massive slide since late February. Before bulls get excited though, they'll want to see a daily close above prior triangle resistance (on the daily chart) which will dramatically increase the odds of a test of triangle resistance (on the weekly chart) in the several days after. The odds for a retest this week of the 2021 low coinciding with the psychologically key 1300 whole figure level is moderately low. The weekly and daily RSI, Stochastics and MACD are mostly bottomish. I am long as of yesterday at 1345, although if I were flat, I'd look to enter long in the green zone of the daily chart (in the ~1315-1340 range), targeting the red zone (of the daily chart in the ~1375-1400 range), for Tuesday. The amber/yellow zone (in the ~1280-1310 range) is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).
