

# TODAY'S TOP 3 TRADES

April 15, 2022

## SOFTS (RAW SUGAR, COCOA) + TODAY'S TOP TRADE (GBPAUD)

### RAW SUGAR (SB)

SB spent the past week consolidating the Bull Flag extension from the prior week, closing the Good Friday holiday-shortened week around the psychologically key 0.20 whole figure level. Odds are moderately high for a test of the 2017 high before month end. Raw Sugar (SB) is vulnerable though to first edge lower next week to upchannel support (on the 4hr chart). The tiring weekly RSI and Stochastics are weighing on the still upsloping weekly MACD. When SB reopens Monday after today's Good Friday holiday, I will look to enter long in the green zone (of the daily chart), targeting the red zone for Friday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

### Weekly/Daily/4hr

Darren Chu, CFA

Join the world's largest asset manager and 2 of the world's 5 largest (and 5 of the 10 largest) hedge funds by AUM as daily readers of [Tradable Patterns'](https://tradablepatterns.com) technical analysis. As seen on Bloomberg, Refinitiv, Factset, Interactive Brokers, readers include global top 10 investment banks. **If you represent an institutional investor or potential distribution partner, write to [info@tradablepatterns.com](mailto:info@tradablepatterns.com) to request Bloomberg, Refinitiv and Factset readership reports.**

**COCOA (CC)**

CC closed the Good Friday holiday-shortened week near the 38.2% Fib retrace of the February to March slide, stalling in the bounce off near the psychologically key 2500 whole figure level. To regain some renewed bullish momentum within the roughly 4 year sideways trend, CC will have to see a higher April high versus the March high. [Congratulations to readers who benefited from the Aug 9, 2021 alert of CC's increasing bounce momentum](#), and from [the major trend reversal opportunity highlighted Jul 23, 2020](#) and again on [Nov 13, 2020](#). The weekly RSI and Stochastics are tiring, weighing on the somewhat bottomish weekly MACD. When CC reopens Monday, I will look to enter long in the green zone (of the daily chart), targeting the red zone for Friday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

**Weekly/Daily/4hr**

## GBPAUD

The GBPAUD has broken this week above descending wedge resistance (on the weekly chart) and will all but form the 1<sup>st</sup> green weekly candle in 11 weeks. Although some healthy profittaking could kick in today with the GBPAUD bumping up against ascending wedge resistance (on the 4hr chart), the GBPAUD is unlikely to slide back below the psychologically key 1.75 whole figure level. With US-based traders largely taking Good Friday off for holiday, any escalation or ceasefire in the Ukraine-Russia conflict before the weekend could result in exaggerated moves. Except for the weekly MACD which still slopes down, the weekly, daily and 4hr RSI, Stochastics and MACD are bottomish, rallying or consolidating recent gains. I am looking to enter long in the green zone (of the daily chart), targeting the red zone for Thursday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

## CRYPTO WEEKLY OUTLOOK

ETHEREUM + INDUSTRY FUNDAMENTALS + BITCOIN + RIPPLE

### ETHEREUM (ETHUSD)

Nov 28, 2021

Ethereum (ETHUSD) is deepening in its correction, and appears poised to slide further this week. Significantly, ETHUSD is at high risk of exceeding the September pullback in magnitude, following in Bitcoin (BTCUSD)'s footsteps. The current 2 week downturn is testing the psychologically key 4k whole figure level, and appears to be gravitating towards an uptrend support line (on the weekly chart) connecting the July and September lows. Odds are elevated for a test of the 50% Fib retrace of the July to October rally sometime in December. ETHUSD's correlation to BTCUSD (on a weekly chart) is at 0.95, near the upper end of its 5 year range. [Congratulations to readers alerted August 1st of the completion of the major June-July bottom](#), and to those who heeded [the warning May 16th of the major top forming](#). The weekly RSI, Stochastics and MACD are tiring, weighing on the attempting to bottom daily RSI and Stochastics. I am likely going to remain flat this week but would consider going long in the 3000-3300 range, targeting a 3000-4000 range for December.

Equities & ETFs is an Entries/Exits service inspired by technical analysis on a collection of equities and ETFs.

I look to explore new long/short trade ideas on Equities & ETFs with Premium Members with a target of 5 multi-week to multi-month swing trades each month. Premium Members also have access to monthly and weekly chart technical analysis for 5 Equity/ETF markets each Saturday.

# COFFEE DAILY

Jan 2, 2022

## ROBUSTA COFFEE (RC)

Robusta Coffee (RC) edged lower Friday, closing 2021 just below the fresh year high. Significantly, with the new year beginning, odds are high after last year's strong bull market for RC to at least see a healthy correction. RC is bumping up against upchannel resistance (on the weekly chart), with some hesitation late last week as seen by the 2 consecutive daily Dojis. Any test of the psychologically key 2500 whole figure level will likely have to wait until at least Feb February. The weekly and daily RSI, Stochastics and MACD are rallying or consolidating recent gains. I am looking at entering long in the green zone of the daily chart (in the ~2270-2330 range), targeting the red zone (of the daily chart in the ~2400-2450 range) for Friday. The amber/yellow zone (in the ~2190-2240 range) is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).
