TODAY'S TOP 3 TRADES

May 25, 2022

METALS/ENERGY (WTI CRUDE, NATURAL GAS) + TODAY'S TOP TRADE (GBPUSD) WTI CRUDE (CL)

WTI Crude (CL) is in the advanced stages of a weekly chart Bull Flag consolidation, where the Bull Flag is arguably extending. Nevertheless, with CL bumping up against upchannel resistance (on the daily chart), CL is vulnerable to another pullback to last week's low before month end. Volatility will surge after today's highly anticipated 1030am EST weekly inventory data, 2pm EST FOMC Minutes, Thursday's US GDP and Friday's US PCE Price Index data. Monitor as usual for any signs of escalation or ceasefire in the Ukraine-Russia conflict. [Congratulations to readers who heeded the August 4, 2021 warning of CL's vulnerability](#), and to [Premium Members who benefited from the bullish triangle breakout highlighted Nov 18, 2020](#). The weekly, daily and 4hr RSI, Stochastics and MACD are rallying or bottomish. I am looking at entering long in the green zone (of the daily chart), targeting the red zone for Tuesday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

Join the world's largest asset manager and 2 of the world's 5 largest (and 5 of the 10 largest) hedge funds by AUM as daily readers of [Tradable Patterns' technical analysis](#). As seen on Bloomberg, Refinitiv, Factset, Interactive Brokers, readers include global top 10 investment banks. **If you represent an institutional investor or potential distribution partner, write to info@tradablepatterns.com to request Bloomberg, Refinitiv and Factset readership reports.**

NATURAL GAS (NG)

Natural Gas (NG) is beginning to hesitate as it retests its 2022 high, and appears vulnerable to profit-taking following Thursday's highly anticipated weekly storage data. Given that NG is bumping up against uptrend resistance (on the 4hr chart), a slide back towards the same uptrend's support by next week is moderately likely. Nevertheless, unless NG breaks below ascending wedge support (on the weekly chart) and the psychologically key 7 whole figure level by month end, NG appears to be poised merely for a correction as opposed to the end of the bull market from early 2020 seen more clearly on a tradingview.com monthly continuous chart. Watch for volatility as usual on any signs of escalation or ceasefire in the Ukraine-Russia conflict. Congratulations to Premium Members who benefited from the opportunities highlighted [Jan 19, 2022](#), [Jan 27, 2021](#) and [April 14, 2021](#). The weekly and daily RSI, Stochastics and MACD are bottomish, rallying or consolidating recent gains. I am looking to enter long in the green zone (of the daily chart), targeting the red zone for Tuesday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

Weekly/Daily/4hr

GBPUSD

The GBPUSD is consolidating the strong week plus bounce off downtrend support (on the weekly chart), and at moderate risk of retesting last week's low before month end with the GBPUSD struggling at downchannel resistance (on the daily chart). Nevertheless, the GBPUSD has been making progress in its early efforts at halting its downtrend (on the weekly chart), where the current monthly Hammer (as can be seen on tradingview.com) has bounced off the 2016 and 2019 lows. Watch for a high probability retest of last week's low following today's 2pm EST FOMC Minutes, Thursday's US GDP and Friday's US PCE Price Index data. Volatility will spike as usual on any signs of escalation or ceasefire in the Ukraine-Russia conflict. The weekly and daily RSI, Stochastics and MACD are bottomish, rallying, or consolidating recent gains. I am long as of yesterday at 1.254 although if I were flat, I'd look to go long in the green zone (of the daily chart), targeting the red zone for Tuesday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

CRYPTO WEEKLY OUTLOOK

ETHEREUM + INDUSTRY FUNDAMENTALS + BITCOIN + RIPPLE

ETHEREUM (ETHUSD)

Nov 28, 2021

Ethereum (ETHUSD) is deepening in its correction, and appears poised to slide further this week. Significantly, ETHUSD is at high risk of exceeding the September pullback in magnitude, following in Bitcoin (BTCUSD)'s footsteps. The current 2 week downturn is testing the psychologically key 4k whole figure level, and appears to be gravitating towards an uptrend support line (on the weekly chart) connecting the July and September lows. Odds are elevated for a test of the 50% Fib retrace of the July to October rally sometime in December. ETHUSD's correlation to BTCUSD (on a weekly chart) is at 0.95, near the upper end of its 5 year range. [Congratulations to readers alerted August 1st of the completion of the major June-July bottom](#), and to those who heeded [the warning May 16th of the major top forming](#). The weekly RSI, Stochastics and MACD are tiring, weighing on the attempting to bottom daily RSI and Stochastics. I am likely going to remain flat this week but would consider going long in the 3000-3300 range, targeting a 3000-4000 range for December.

COFFEE DAILY

Jan 2, 2022

ROBUSTA COFFEE (RC)

Robusta Coffee (RC) edged lower Friday, closing 2021 just below the fresh year high. Significantly, with the new year beginning, odds are high after last year's strong bull market for RC to at least see a healthy correction. RC is bumping up against upchannel resistance (on the weekly chart), with some hesitation late last week as seen by the 2 consecutive daily Dojis. Any test of the psychologically key 2500 whole figure level will likely have to wait until at least Feb February. The weekly and daily RSI, Stochastics and MACD are rallying or consolidating recent gains. I am looking at entering long in the green zone of the daily chart (in the ~2270-2330 range), targeting the red zone (of the daily chart in the ~2400-2450 range) for Friday. The amber/yellow zone (in the ~2190-2240 range) is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).
