# TODAY'S TOP 3 TRADES

Jul 25, 2022

## AGRIS (WHEAT, CORN) + TODAY'S TOP TRADE (GBPUSD)

### WHEAT (ZW)

Wheat (ZW) is gapping up almost 3% to start the week, trying to halt the slide since the 2022 peak in May. Although ZW remains vulnerable to sliding to downchannel support (on the daily chart) in the next week, odds are higher for ZW to bounce from current levels which coincide with the 61.8% Fib retrace of the December 2016 to February 2022 bull market (as can be seen on [tradingview.com](https://tradingview.com)). Any daily close above downchannel resistance (on the daily chart) will likely be followed in the few days after by a test of the July high. Watch as usual for an escalation in the Ukraine-Russia conflict. [Congratulations to Premium Members alerted Feb 14, 2022 to the looming resumption in the major uptrend and who benefited](#), along with those who took advantage of [the Aug 21, 2020 highlighting of ZW's major bottoming effort](#). Except for the still downsloping weekly MACD, the weekly, daily and 4hr RSI, Stochastics and MACD are bottomish. I am looking to go long in the green zone (of the daily chart), targeting the red zone for Friday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter). ## CRYPTO WEEKLY OUTLOOK

ETHEREUM + INDUSTRY FUNDAMENTALS + BITCOIN + RIPPLE

### ETHEREUM (ETHUSD)

Nov 28, 2021

Ethereum (ETHUSD) is deepening in its correction, and appears poised to slide further this week. Significantly, ETHUSD is at high risk of exceeding the September pullback in magnitude, following in Bitcoin (BTCUSD)'s footsteps. The current 2 week downturn is testing the psychologically key 4k whole figure level, and appears to be gravitating towards an uptrend support line (on the weekly chart) connecting the July and September lows. Odds are elevated for a test of the 50% Fib retrace of the July to October rally sometime in December. ETHUSD's correlation to BTCUSD (on a weekly chart) is at 0.95, near the upper end of its 5 year range. [Congratulations to readers alerted August 1st of the completion of the major June-July bottom](#), and to those who heeded [the warning May 16th of the major top forming](#). The weekly RSI, Stochastics and MACD are tiring, weighing on the attempting to bottom daily RSI and Stochastics. I am likely going to remain flat this week but would consider going long in the 3000-3300 range, targeting a 3000-4000 range for December.

# COFFEE DAILY

Jan 2, 2022

## ROBUSTA COFFEE (RC)

Robusta Coffee (RC) edged lower Friday, closing 2021 just below the fresh year high. Significantly, with the new year beginning, odds are high after last year's strong bull market for RC to at least see a healthy correction. RC is bumping up against upchannel resistance (on the weekly chart), with some hesitation late last week as seen by the 2 consecutive daily Dojis. Any test of the psychologically key 2500 whole figure level will likely have to wait until at least Feb February. The weekly and daily RSI, Stochastics and MACD are rallying or consolidating recent gains. I am looking at entering long in the green zone of the daily chart (in the ~2270-2330 range), targeting the red zone (of the daily chart in the ~2400-2450 range) for Friday. The amber/yellow zone (in the ~2190-2240 range) is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).
