

TODAY'S TOP 3 TRADES

Aug 1, 2022

AGRIS (SOYBEAN, CORN) + TODAY'S TOP TRADE (GBPUSD) SOYBEAN (ZS)

Soybean (ZS) is tiring after last week's massive rebound, with ZS just shy of the psychologically key 1500 level. ZS appears vulnerable to breaking upchannel support (on the 4hr chart) in the next few days, and will likely want to spend the next week or so catching its breath near the 50% Fib retrace of the June to July slide. Odds are moderate for a retest in August of the 50% Fib retrace of the May 2019 to June 2022 bull market (as can be seen on tradingview.com). Watch as usual for on any sign of escalation in the Ukraine-Russia conflict. [Congratulations to Premium Members alerted Aug 24, 2020 to ZS remaining in play for a pending rally continuation](#) and to those warned of [the short opportunity Jun 14, 2021](#) and who benefited. The weekly and daily RSI, Stochastics and MACD are bottomish, rallying or consolidating recent gains. I'm looking to enter long in the green zone (of the daily chart), targeting the red zone for Friday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

CORN (ZC)

Corn (ZC) is looking wobbly to start the week, and is vulnerable to some profittaking after last week's strong bounce. ZC is poised to break upchannel support (on the 4hr chart) and retest the psychologically key 600 whole figure level. Odds remain elevated for a retest in August sometime of the July low, coinciding with the 50% Fib retrace of the April 2020 to April 2022 bull market (as can be seen on tradingview.com). Watch as usual for on any sign of escalation in the Ukraine-Russia conflict. [Congratulations to Premium Members who benefited from the May 28, 2020 alert to ZC's major bottoming effort](#) and again on [Aug 24, 2020](#). Except for the weekly MACD which still slopes down, the weekly and daily RSI, Stochastics and MACD are bottomish, rallying or consolidating recent gains. I am looking to enter long in the green zone (of the daily chart), targeting the red zone for Friday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

Weekly/Daily/4hr

GBPUSD

The GBPUSD is making progress in forming a major bottom after closing last week decisively above descending wedge resistance (on the weekly chart). Bullish momentum is building as seen by how quickly the GBPUSD bounced after sliding briefly slide to near upchannel support (on the 4hr chart). Odds are decent for a higher August high versus the July high. Bullish catalysts could arrive following today's 10am EST release of the US ISM manufacturing PMI data, Tuesday's US JOLTS job openings, Wednesday's US ISM services PMI, Thursday's BoE monetary policy report/summary and rate announcement and Friday's highly anticipated US Non-Farm Payrolls (NFP). The weekly and daily RSI, Stochastics and MACD are bottomish, rallying or consolidating recent gains. I am looking to go long in the green zone (of the daily chart), targeting the red zone for Friday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

Weekly/Daily/4hr

Write to info@tradablepatterns.com to learn about how Institutional/Accredited Investors can gain exposure to a Singapore (MAS)-regulated Multi-Strategy fund that provides access to:

- 1) Deeply discounted listed tokens
- 2) High growth Seed to Series B stage equity and convertible debt opportunities within tech (mostly blockchain/crypto-related)
- 3) Difficult to access Seed stage token rounds for blockchain/crypto startups w/ strong management teams and product-market fit
- 4) Income generation through options writing

Looking to launch a fund or a family office under a Singapore (MAS) regulated entity? Give us a shout at info@tradablepatterns.com.

CRYPTO WEEKLY OUTLOOK

ETHEREUM + INDUSTRY FUNDAMENTALS + BITCOIN + RIPPLE

ETHEREUM (ETHUSD)

Nov 28, 2021

Ethereum (ETHUSD) is deepening in its correction, and appears poised to slide further this week. Significantly, ETHUSD is at high risk of exceeding the September pullback in magnitude, following in Bitcoin (BTCUSD)'s footsteps. The current 2 week downturn is testing the psychologically key 4k whole figure level, and appears to be gravitating towards an uptrend support line (on the weekly chart) connecting the July and September lows. Odds are elevated for a test of the 50% Fib retrace of the July to October rally sometime in December. ETHUSD's correlation to BTCUSD (on a weekly chart) is at 0.95, near the upper end of its 5 year range. [Congratulations to readers alerted August 1st of the completion of the major June-July bottom](#), and to those who heeded [the warning May 16th of the major top forming](#). The weekly RSI, Stochastics and MACD are tiring, weighing on the attempting to bottom daily RSI and Stochastics. I am likely going to remain flat this week but would consider going long in the 3000-3300 range, targeting a 3000-4000 range for December.

Equities is an Entries/Exits service inspired by technical analysis on a collection of equities.

I look to explore new long/short trade ideas on Equities with Premium Members with a target of 5 multi-week to multi-month swing trades each month. Premium Members also have access to monthly and weekly chart technical analysis for 5 Equity markets each Saturday.

COFFEE DAILY

Jan 2, 2022

ROBUSTA COFFEE (RC)

Robusta Coffee (RC) edged lower Friday, closing 2021 just below the fresh year high. Significantly, with the new year beginning, odds are high after last year's strong bull market for RC to at least see a healthy correction. RC is bumping up against upchannel resistance (on the weekly chart), with some hesitation late last week as seen by the 2 consecutive daily Dojis. Any test of the psychologically key 2500 whole figure level will likely have to wait until at least Feb February. The weekly and daily RSI, Stochastics and MACD are rallying or consolidating recent gains. I am looking at entering long in the green zone of the daily chart (in the ~2270-2330 range), targeting the red zone (of the daily chart in the ~2400-2450 range) for Friday. The amber/yellow zone (in the ~2190-2240 range) is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).
