Join the world's largest asset manager and 2 of the world's 5 largest (and 5 of the 10 largest) hedge funds by AUM as daily readers of [Tradable Patterns' technical analysis](#). As seen on Bloomberg, Refinitiv, Factset, Interactive Brokers, readers include global top 10 investment banks. **If you represent an institutional investor or potential distribution partner, write to info@tradablepatterns.com to request Bloomberg, Refinitiv and Factset readership reports.**

Sep 29, 2022

FX (GBPUSD, GBPAUD) + TODAY'S TOP TRADE (ARABICA COFFEE)

GBPUSD

The GBPUSD is beginning to see some profit-taking after the strong bounce off the fresh record low Monday. Regardless of the GBPUSD clawing back above downchannel support (on the weekly chart) after plunging below it this week, it remains at moderate risk of gravitating towards parity in October. The weekly Hammer currently forming though suggests a roughly equal chance that Monday's low may have marked a major bottom. Before bulls get excited, they'll want to see a daily close above the daily chart downchannel resistance and the psychologically key 1.10 whole figure level. Watch for volatility following Friday's US core PCE price index release. The escalation in the Ukraine-Russia conflict deserves close monitoring. The still downsloping weekly MACD is weighing on the bottomish weekly RSI and Stochastics. I am looking to go long in the green zone (of the daily chart), targeting the red zone for Wednesday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

Weekly/Daily/4hr

Bloomberg

REFINITIV

FACTSET

FINANCIAL TIMES

ALPHAVILLE

GBPAUD

The GBPAUD has made a sharp reversal from Monday's massive spike down to the lowest level since 2017. The length of the lower shadow of Monday's candle and this week's candle, suggests that the bottom for 2022 is likely in. The GBPAUD has also bounced this week off descending wedge support (on the weekly chart). Nevertheless, the GBPAUD may pullback a bit before the weekend on healthy consolidation as those who bought near the depths of Monday's plunge take profit. The odds are decent for testing the psychologically key 1.70 whole figure level and descending wedge resistance (on the weekly chart) by early October. The still downsloping weekly MACD is weighing on the bottomish weekly RSI and Stochastics. I am looking to enter long in the green zone (of the daily chart), targeting the red zone for Wednesday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

Weekly/Daily/4hr

ARABICA COFFEE (KC)

Arabica Coffee (KC) surged almost 2% yesterday, and appears to have finished consolidating just above triangle resistance (on the daily chart). KC is comfortably above the 38.2% Fib retrace of the July to August rally, and has all but halted its slide from downchannel resistance (on the weekly chart). Odds are high for a completion before year end of the broader Bull Flag consolidation (on the weekly chart) that began in December (and seen more easily on a monthly chart on tradingview.com). [Congratulations to readers who benefited from the July 24, 2020 report highlighting the growing momentum behind KC's major bottoming efforts](#) and again on [Nov 13th](#). Note [the gains in the 1 week since the July 16, 2021 alert of the looming Bull Flag Extension](#). The weekly, daily and 4hr RSI, Stochastics and MACD are bottomish, rallying or consolidating recent gains. I am looking at entering long in the green zone of the daily chart (in the ~2.20-2.27 range), targeting the red zone (of the daily chart in the ~2.32-2.40 range) for Wednesday. The amber/yellow zone (in the ~2.10-2.16 range) is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

Weekly/Daily/4hr

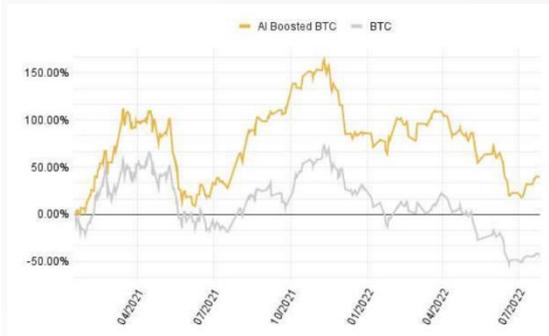

Write to info@tradablepatterns.com to learn about how Institutional/Accredited Investors can gain exposure to a Singapore (MAS)-regulated Multi-Strategy fund that provides access to:

- 1) Neural network AI-based crypto exposure
- 2) Deeply discounted listed tokens
- 3) High growth Seed to Series B stage equity and convertible debt opportunities within tech (mostly blockchain/crypto-related)

4) Difficult to access Seed stage token rounds for blockchain/crypto startups w/ strong management teams and product-market fit

We use machine learning to create trading signals and generate consistent alpha (market outperformance) since 2020.

Strategies Summary

- 9 active models based on AI/ML
- Trades spot (live since Nov 2020) and futures (in testing, ETA Dec 2022)
- Trades highly liquid markets (BTC, ETH, BNB, etc.)
- Model input: Market data (OHLCV)
- Model output: BUY/SELL/HOLD + % portfolio
- Trade frequency: 4-10 trades per week (8-10x AUM/mo)

Technology Summary

- Developed in-house, proprietary
- Not a rule-based algo
- Cutting edge neural network architectures (LSTM, GRU, Performer (Transformer), GMLP, Filter)
- Self-learning and adaptive (uses reinforcement learning)
- Scalable to other markets
- Difficult to replicate

CRYPTO WEEKLY OUTLOOK

ETHEREUM + INDUSTRY FUNDAMENTALS + BITCOIN + RIPPLE

ETHEREUM (ETHUSD)

Nov 28, 2021

Ethereum (ETHUSD) is deepening in its correction, and appears poised to slide further this week. Significantly, ETHUSD is at high risk of exceeding the September pullback in magnitude, following in Bitcoin (BTCUSD)'s footsteps. The current 2 week downturn is testing the psychologically key 4k whole figure level, and appears to be gravitating towards an uptrend support line (on the weekly chart) connecting the July and September lows. Odds are elevated for a test of the 50% Fib retrace of the July to October rally sometime in December. ETHUSD's correlation to BTCUSD (on a weekly chart) is at 0.95, near the upper end of its 5 year range. [Congratulations to readers alerted August 1st of the completion of the major June-July bottom](#), and to those who heeded [the warning May 16th of the major top forming](#). The weekly RSI, Stochastics and MACD are tiring, weighing on the attempting to bottom daily RSI and Stochastics. I am likely going to remain flat this week but would consider going long in the 3000-3300 range, targeting a 3000-4000 range for December.

Equities is an Entries/Exits service inspired by technical analysis on a collection of equities.

I look to explore new long/short trade ideas on Equities with Premium Members with a target of 5 multi-week to multi-month swing trades each month. Premium Members also have access to monthly and weekly chart technical analysis for 5 Equity markets each Saturday.

COFFEE DAILY

Jan 2, 2022

ROBUSTA COFFEE (RC)

Robusta Coffee (RC) edged lower Friday, closing 2021 just below the fresh year high. Significantly, with the new year beginning, odds are high after last year's strong bull market for RC to at least see a healthy correction. RC is bumping up against upchannel resistance (on the weekly chart), with some hesitation late last week as seen by the 2 consecutive daily Dojis. Any test of the psychologically key 2500 whole figure level will likely have to wait until at least Feb February. The weekly and daily RSI, Stochastics and MACD are rallying or consolidating recent gains. I am looking at entering long in the green zone of the daily chart (in the ~2270-2330 range), targeting the red zone (of the daily chart in the ~2400-2450 range) for Friday. The amber/yellow zone (in the ~2190-2240 range) is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).
