

# TODAY'S TOP 3 TRADES

Sep 13, 2022

**INDICES (NASDAQ100, S&P500) + TODAY'S TOP TRADE (EURUSD)**

## NASDAQ100 (NQ)

Nasdaq100 (NQ) is slowing in its bounce off last week's low, hesitating as what is arguably an ascending wedge (on the 4hr chart) nears completion. Nevertheless, NQ appears poised to at least test downtrend resistance (on the weekly chart) this week, where any recapture of the August high this month will likely extend the Dead Cat Bounce that began in June into October. A lower September high versus the August high would reinforce the lower September low versus the August low. Volatility will arrive following today's 830am EST US CPI, Wednesday's US PPI, Thursday's US retail sales, and Friday's preliminary University of Michigan consumer sentiment. Watch as usual for any signs of escalation in the Ukraine-Russia conflict. [Congratulations to Premium Subscribers who benefited from the Jan 18, 2022 warning of the NQ keeling over on a monthly chart, the alert February 18th, 2020 one day before the record high in the S&P500, warning of a pending slide in the Nasdaq100 and from the March 24th, 2020 report highlighting the looming multi-day to multi-week rebound in NQ.](#) The weekly, daily and 4hr RSI, Stochastics and MACD are bottomish, rallying or consolidating recent gains. I am looking to enter short in the red zone (of the daily chart), targeting the green zone for Monday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

**ALPHAVILLE**

## S&P500 (ES)

The S&P500 (ES) is slowing in its bounce off last week's low, looking to consolidate after reclaiming half of the losses from the August peak. If ES manages to break above the downtrend resistance (on the weekly chart) back to the August high, the June to August Dead Cat bounce will likely extend into October. Any lower September high versus the August high will reinforce the lower September low versus the August low. Volatility will arrive following today's 830am EST US CPI, Wednesday's US PPI, Thursday's US retail sales, and Friday's preliminary University of Michigan consumer sentiment. Watch as usual for any signs of escalation in the Ukraine-Russia conflict. [Congratulations to paying subscribers who benefited from the February 18, 2020 analysis one day before the record high in the ES, warning of the pending slide in the S&P500.](#) The weekly and daily RSI, Stochastics and MACD are bottomish, rallying or consolidating recent gains. I am looking to enter short in the red zone (of the daily chart), targeting the green zone for Monday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

## Weekly/Daily/4hr

## EURUSD

The EURUSD is hesitating as seen by the weekly Doji trying to form as it nears downchannel resistance (on the weekly chart). A daily close above descending wedge resistance (on the daily chart) would help advance the major bottoming effort near the psychologically key 1.00 whole figure level. For now, the EURUSD remains within a slide since June 2021, which itself is a part of a major downtrend from 2008 (as can be seen on [tradingview.com](https://tradingview.com)). Watch as usual for any signs of escalation in the Ukraine-Russia conflict. The weekly and daily RSI, Stochastics and MACD are bottomish, rallying or consolidating recent gains. I am long as of yesterday at 1.014 although if I were flat, I'd look to enter long in the green zone (of the daily chart), targeting the red zone for Monday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

### Weekly/Daily/4hr

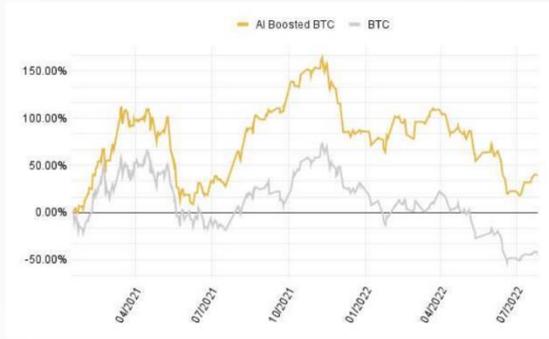

Write to [info@tradablepatterns.com](mailto:info@tradablepatterns.com) to learn about how Institutional/Accredited Investors can gain exposure to a Singapore (MAS)-regulated Multi-Strategy fund that provides access to:

- 1) Neural network AI-based crypto exposure
- 2) Deeply discounted listed tokens
- 3) High growth Seed to Series B stage equity and convertible debt opportunities within tech (mostly blockchain/crypto-related)
- 4) Difficult to access Seed stage token rounds for blockchain/crypto startups w/ strong management teams and product-market fit

We use machine learning to create trading signals and generate consistent alpha (market outperformance) since 2020.

## Strategies Summary

- 9 active models based on AI/ML
- Trades spot (live since Nov 2020) and futures (in testing, ETA Dec 2022)
- Trades highly liquid markets (BTC, ETH, BNB, etc.)
- Model input: Market data (OHLCV)
- Model output: BUY/SELL/HOLD + % portfolio
- Trade frequency: 4-10 trades per week (8-10x AUM/mo)

## Technology Summary

- Developed in-house, proprietary
- Not a rule-based algo
- Cutting edge neural network architectures (LSTM, GRU, Performer (Transformer), GMLP, Filter)
- Self-learning and adaptive (uses reinforcement learning)
- Scalable to other markets
- Difficult to replicate

## CRYPTO WEEKLY OUTLOOK

ETHEREUM + INDUSTRY FUNDAMENTALS + BITCOIN + RIPPLE

### ETHEREUM (ETHUSD)

Nov 28, 2021

Ethereum (ETHUSD) is deepening in its correction, and appears poised to slide further this week. Significantly, ETHUSD is at high risk of exceeding the September pullback in magnitude, following in Bitcoin (BTCUSD)'s footsteps. The current 2 week downturn is testing the psychologically key 4k whole figure level, and appears to be gravitating towards an uptrend support line (on the weekly chart) connecting the July and September lows. Odds are elevated for a test of the 50% Fib retrace of the July to October rally sometime in December. ETHUSD's correlation to BTCUSD (on a weekly chart) is at 0.95, near the upper end of its 5 year range. [Congratulations to readers alerted August 1st of the completion of the major June-July bottom](#), and to those who heeded [the warning May 16th of the major top forming](#). The weekly RSI, Stochastics and MACD are tiring, weighing on the attempting to bottom daily RSI and Stochastics. I am likely going to remain flat this week but would consider going long in the 3000-3300 range, targeting a 3000-4000 range for December.

Equities is an Entries/Exits service inspired by technical analysis on a collection of equities.

I look to explore new long/short trade ideas on Equities with Premium Members with a target of 5 multi-week to multi-month swing trades each month. Premium Members also have access to monthly and weekly chart technical analysis for 5 Equity markets each Saturday.

# COFFEE DAILY

Jan 2, 2022

## ROBUSTA COFFEE (RC)

Robusta Coffee (RC) edged lower Friday, closing 2021 just below the fresh year high. Significantly, with the new year beginning, odds are high after last year's strong bull market for RC to at least see a healthy correction. RC is bumping up against upchannel resistance (on the weekly chart), with some hesitation late last week as seen by the 2 consecutive daily Dojis. Any test of the psychologically key 2500 whole figure level will likely have to wait until at least Feb February. The weekly and daily RSI, Stochastics and MACD are rallying or consolidating recent gains. I am looking at entering long in the green zone of the daily chart (in the ~2270-2330 range), targeting the red zone (of the daily chart in the ~2400-2450 range) for Friday. The amber/yellow zone (in the ~2190-2240 range) is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).
