# TODAY'S TOP 3 TRADES

Oct 19, 2022

## METALS/ENERGY (SILVER, NATURAL GAS) + TODAY'S TOP TRADE (NASDAQ100)

### SILVER (SI)

Silver (SI) is consolidating near downchannel resistance (on the 4hr chart), trying to halt the slide since the October high. Before bulls get excited, they'll need to see a reclaiming of the psychologically key 20 whole figure level, which would dramatically increase odds of a test of the October high in the few days after. In the meantime, the still sizeable gap between the descending wedge support and resistance (on the weekly chart) suggests an elevated risk for a retesting of the 2022 low before month end, and moderate odds of sliding back to wedge support at least one more time as part of the major bottoming effort. Watch for volatility with Thursday's US Philly Fed manufacturing index, and with further escalation in the Ukraine-Russia conflict. [Congratulations to readers who heeded the warning December 16, 2020 of SI's breakout above its daily chart downchannel resistance and who benefited.](#) Except for the daily MACD which still slopes down, the weekly and daily RSI, Stochastics and MACD are bottomish. I am looking to enter long in the green zone (of the daily chart), targeting the red zone for Tuesday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

## NATURAL GAS (NG)

Natural Gas (NG) is slowing in the slide from its 2022 high in August, with a bit of short covering likely ahead of Thursday's widely anticipated weekly storage. NG is trying to find support as it is now at roughly the 50% Fib retrace of the March 2020 – August 2022 bull market, and nearing completion on the 4hr and daily chart descending wedge. Nevertheless, NG remains moderately vulnerable to testing the June/July low after having slid Monday/Tuesday below uptrend support (on the weekly chart) and the 61.8% Fib retrace of the January to August rally extension. Watch as usual for any signs of escalation in the Ukraine-Russia conflict. Congratulations to Premium Members who benefited from the opportunities highlighted [Jan 19, 2022](#), [Jan 27, 2021](#) and [April 14, 2021](#). The still downsloping weekly Stochastics and MACD are weighing on the early stage bottomish weekly RSI and Stochastics. I am looking to enter long in the green zone (of the daily chart), targeting the red zone for Tuesday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

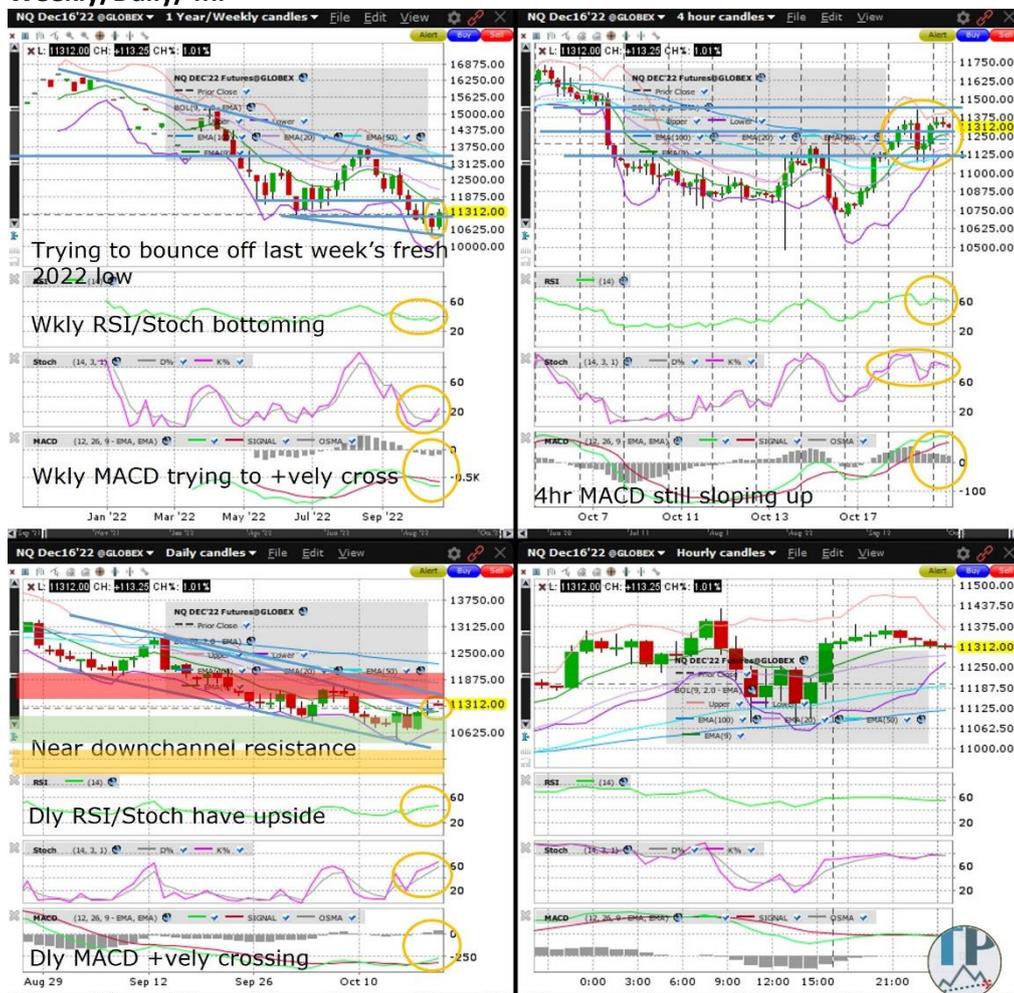

### Weekly/Daily/4hr

## NASDAQ100 (NQ)

Nasdaq100 (NQ) is consolidating yesterday's break above descending wedge/downchannel resistance (on the daily chart). NQ appears to be in the early stages of what will likely be a month long or so Dead Cat Bounce. Odds are moderately high for a test of the weekly chart downtrend resistance by November sometime. Any slide back below last week's fresh 2022 low (at ~61.8% Fib retrace of the April 2020 to November 2021 bull market extension) will probably have to wait until December. Watch for some healthy profittaking once NQ bumps against the October high, and triggered potentially by Thursday's US Philly Fed manufacturing index. The escalation in the Ukraine-Russia conflict deserves close monitoring. [Congratulations to Premium Subscribers who benefited from the Jan 18, 2022 warning of the NQ keeling over on a monthly chart](#), [the alert February 18th, 2020 one day before the record high in the S&P500](#), [warning of a pending slide in the Nasdaq100](#) and from [the March 24th, 2020 report highlighting the looming multi-day to multi-week rebound in NQ](#). The weekly, daily and 4hr RSI, Stochastics and MACD are bottomish, rallying or consolidating recent gains. I am looking to enter long in the green zone (of the daily chart), targeting the red zone for Tuesday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

## CRYPTO WEEKLY OUTLOOK

ETHEREUM + INDUSTRY FUNDAMENTALS + BITCOIN + RIPPLE

### ETHEREUM (ETHUSD)

Nov 28, 2021

Ethereum (ETHUSD) is deepening in its correction, and appears poised to slide further this week. Significantly, ETHUSD is at high risk of exceeding the September pullback in magnitude, following in Bitcoin (BTCUSD)'s footsteps. The current 2 week downturn is testing the psychologically key 4k whole figure level, and appears to be gravitating towards an uptrend support line (on the weekly chart) connecting the July and September lows. Odds are elevated for a test of the 50% Fib retrace of the July to October rally sometime in December. ETHUSD's correlation to BTCUSD (on a weekly chart) is at 0.95, near the upper end of its 5 year range. [Congratulations to readers alerted August 1st of the completion of the major June-July bottom](#), and to those who heeded [the warning May 16th of the major top forming](#). The weekly RSI, Stochastics and MACD are tiring, weighing on the attempting to bottom daily RSI and Stochastics. I am likely going to remain flat this week but would consider going long in the 3000-3300 range, targeting a 3000-4000 range for December.

# COFFEE DAILY

Jan 2, 2022

## ROBUSTA COFFEE (RC)

Robusta Coffee (RC) edged lower Friday, closing 2021 just below the fresh year high. Significantly, with the new year beginning, odds are high after last year's strong bull market for RC to at least see a healthy correction. RC is bumping up against upchannel resistance (on the weekly chart), with some hesitation late last week as seen by the 2 consecutive daily Dojis. Any test of the psychologically key 2500 whole figure level will likely have to wait until at least Feb February. The weekly and daily RSI, Stochastics and MACD are rallying or consolidating recent gains. I am looking at entering long in the green zone of the daily chart (in the ~2270-2330 range), targeting the red zone (of the daily chart in the ~2400-2450 range) for Friday. The amber/yellow zone (in the ~2190-2240 range) is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).
