FX (EURUSD, AUDUSD) + TODAY'S TOP TRADE (SILVER)

EURUSD

The EURUSD is trying to gain for a 3rd straight day, nearly complete on the Bull Flag consolidation of the past week after forming a fresh November high. Odds are elevated for a test of the psychologically key 1.05 whole figure level before the weekend. With the EURUSD comfortably above downchannel resistance (on the weekly chart), the EURUSD has halted a slide since June 2021, which itself is a part of a major downtrend from 2008 (as can be seen remains intact on [tradingview.com](#)). The escalation in the Ukraine-Russia conflict deserves close monitoring. [Congratulations to paying subscribers who benefited from the Oct 25, 2022 analysis suggesting early signs of a major bottom forming](#). The weekly, daily and 4hr RSI, Stochastics and MACD are rallying, although the 4hr Stochastics is overbought. I am looking to go long in the green zone (of the daily chart), targeting the red zone for Wednesday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

AUDUSD

The AUDUSD is nearing completion of a Bull flag consolidation that began after forming a fresh November high last week, retesting downchannel resistance (on the weekly chart). The AUDUSD has completed a major bottom, with elevated odds for a test by month end, of the 50% Fib retrace of the slide from the April peak to the October low. The escalation in the Ukraine-Russia conflict deserves close monitoring. [Congratulations to paying subscribers who benefited from the Oct 31, 2022 analysis suggesting another effort at forming a major bottom.](#) The weekly RSI, Stochastics and MACD are rallying, although the 4hr Stochastics is overbought. I am looking to enter long in the green zone (of the daily chart), targeting the red zone for Wednesday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

Weekly/Daily/4hr

SILVER (SI)

Silver (SI) is trying to gain for a 3rd straight day, nearing completion on the consolidation that began at the November high last week. With SI having refused Monday to slide much below the 38.2% Fib retrace of the March to September slide, SI appears ready to regain last week's high and the 50% Fib before month end after forming a major bottom within the consolidation since August 2020 (as can be seen more easily on a monthly chart on tradingview.com). Odds are now moderate for a test of the May high before year end. The escalation in the Ukraine-Russia conflict deserves close monitoring. [Congratulations to paying subscribers who benefited from the Nov 2, 2022 analysis suggesting that SI was in the advanced stages of forming a major bottom.](#) The weekly RSI, Stochastics and MACD are rallying or consolidating recent gains, but weighed by the tiring daily Stochastics. I am looking to enter long in the green zone (of the daily chart), targeting the red zone for Wednesday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

CRYPTO WEEKLY OUTLOOK

ETHEREUM + INDUSTRY FUNDAMENTALS + BITCOIN + RIPPLE

ETHEREUM (ETHUSD)

Nov 28, 2021

Ethereum (ETHUSD) is deepening in its correction, and appears poised to slide further this week. Significantly, ETHUSD is at high risk of exceeding the September pullback in magnitude, following in Bitcoin (BTCUSD)'s footsteps. The current 2 week downturn is testing the psychologically key 4k whole figure level, and appears to be gravitating towards an uptrend support line (on the weekly chart) connecting the July and September lows. Odds are elevated for a test of the 50% Fib retrace of the July to October rally sometime in December. ETHUSD's correlation to BTCUSD (on a weekly chart) is at 0.95, near the upper end of its 5 year range. [Congratulations to readers alerted August 1st of the completion of the major June-July bottom](#), and to those who heeded [the warning May 16th of the major top forming](#). The weekly RSI, Stochastics and MACD are tiring, weighing on the attempting to bottom daily RSI and Stochastics. I am likely going to remain flat this week but would consider going long in the 3000-3300 range, targeting a 3000-4000 range for December.

COFFEE DAILY

Jan 2, 2022

ROBUSTA COFFEE (RC)

Robusta Coffee (RC) edged lower Friday, closing 2021 just below the fresh year high. Significantly, with the new year beginning, odds are high after last year's strong bull market for RC to at least see a healthy correction. RC is bumping up against upchannel resistance (on the weekly chart), with some hesitation late last week as seen by the 2 consecutive daily Dojis. Any test of the psychologically key 2500 whole figure level will likely have to wait until at least Feb February. The weekly and daily RSI, Stochastics and MACD are rallying or consolidating recent gains. I am looking at entering long in the green zone of the daily chart (in the ~2270-2330 range), targeting the red zone (of the daily chart in the ~2400-2450 range) for Friday. The amber/yellow zone (in the ~2190-2240 range) is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).
