

# TODAY'S TOP 3 TRADES

Nov 14, 2022

**SOFTS (SOYBEAN, WHEAT) + TODAY'S TOP TRADE (AUDUSD)**

**SOYBEAN (ZS)**

Soybean (ZS) is consolidating to start the week, hesitating for roughly 2 weeks now just below triangle resistance (on the weekly chart) and near the 50% Fib retrace of the slide from the June high to the July low. Odds are better for a retest of the 2022 high going into year end, than it is for a slide back to the July low during the same period, with the July low coinciding with the 50% Fib retrace of the May 2019 to June 2022 bull market (as can be seen on [tradingview.com](https://tradingview.com)). Keep an eye on the escalation in the Ukraine-Russia conflict. [Congratulations to Premium Members alerted Aug 24, 2020 to ZS remaining in play for a pending rally continuation](#) and to those warned of [the short opportunity Jun 14, 2021](#) and who benefited. The weekly RSI, Stochastics and MACD are bottomish, but weighed by the tiring daily and 4hr RSI and Stochastics. I am looking to enter long in the green zone (of the daily chart), targeting the red zone for Friday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

## WHEAT (ZW)

Wheat (ZW) is trying to firm to start the week, but remains vulnerable to sliding back to the 2022 low before month end. ZW will need to reclaim last week's high and break above descending wedge resistance (on the weekly chart) to neutralize the still moderately bearish momentum. Keep an eye on the escalation in the Ukraine-Russia conflict. [Congratulations to Premium Members alerted Feb 14, 2022 to the looming resumption in the major uptrend and who benefited](#), along with those who took advantage of [the Aug 21, 2020 highlighting of ZW's major bottoming effort](#). Except for the daily MACD which still slopes down, the weekly, daily and 4hr RSI, Stochastics and MACD are bottomish or rallying. I am looking to go long in the green zone (of the daily chart), targeting the red zone for Friday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

### Weekly/Daily/4hr

## AUDUSD

The AUDUSD is consolidating to start the week, hesitating after a strong bounce off the October low. The AUDUSD has all but completed a major bottom but is at elevated risk for a bit of healthy profit-taking in the next few days as it bumps into downchannel resistance (on the weekly chart) and the 38.2% Fib retrace of the slide from the April peak to the October low. Any pullback to the psychologically key 0.65 whole figure level will likely find strong support. Watch for volatility following Tuesday's monetary policy meeting minutes, along with after the US Empire State manufacturing index and PPI data. The news onslaught continues Wednesday with the Australian wage price index change, the US' retail sales, and on Thursday with the Australian employment change and unemployment rate, and the US' Philly Fed manufacturing index. The escalation in the Ukraine-Russia conflict deserves close monitoring. The weekly RSI, Stochastics and MACD are bottomish or consolidating recent gains. I am looking to enter long in the green zone (of the daily chart), targeting the red zone for Friday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

## CRYPTO WEEKLY OUTLOOK

ETHEREUM + INDUSTRY FUNDAMENTALS + BITCOIN + RIPPLE

### ETHEREUM (ETHUSD)

Nov 28, 2021

Ethereum (ETHUSD) is deepening in its correction, and appears poised to slide further this week. Significantly, ETHUSD is at high risk of exceeding the September pullback in magnitude, following in Bitcoin (BTCUSD)'s footsteps. The current 2 week downturn is testing the psychologically key 4k whole figure level, and appears to be gravitating towards an uptrend support line (on the weekly chart) connecting the July and September lows. Odds are elevated for a test of the 50% Fib retrace of the July to October rally sometime in December. ETHUSD's correlation to BTCUSD (on a weekly chart) is at 0.95, near the upper end of its 5 year range. [Congratulations to readers alerted August 1st of the completion of the major June-July bottom](#), and to those who heeded [the warning May 16th of the major top forming](#). The weekly RSI, Stochastics and MACD are tiring, weighing on the attempting to bottom daily RSI and Stochastics. I am likely going to remain flat this week but would consider going long in the 3000-3300 range, targeting a 3000-4000 range for December.

# COFFEE DAILY

Jan 2, 2022

## ROBUSTA COFFEE (RC)

Robusta Coffee (RC) edged lower Friday, closing 2021 just below the fresh year high. Significantly, with the new year beginning, odds are high after last year's strong bull market for RC to at least see a healthy correction. RC is bumping up against upchannel resistance (on the weekly chart), with some hesitation late last week as seen by the 2 consecutive daily Dojis. Any test of the psychologically key 2500 whole figure level will likely have to wait until at least Feb February. The weekly and daily RSI, Stochastics and MACD are rallying or consolidating recent gains. I am looking at entering long in the green zone of the daily chart (in the ~2270-2330 range), targeting the red zone (of the daily chart in the ~2400-2450 range) for Friday. The amber/yellow zone (in the ~2190-2240 range) is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).
