

TODAY'S TOP 3 TRADES

Dec 1, 2022

FX (EURUSD, GBPUSD) + TODAY'S TOP TRADE (SILVER)

EURUSD

The EURUSD appears to be gearing up to complete the 2 week plus Bull Flag consolidation and retest the psychologically key 1.05 whole figure level before the weekend. With the EURUSD comfortably above downchannel resistance (on the weekly chart), the EURUSD has halted a slide since June 2021, which itself is a part of a major downtrend from 2008 (as can be seen remains intact on tradingview.com). A bullish catalyst may occur with any of today's 830am EST US core PCE price index and 10am EST ISM manufacturing PMI data and Friday following the US Non-Farm Payrolls (NFP), earnings and unemployment data. The escalation in the Ukraine-Russia conflict deserves close monitoring. [Congratulations to paying subscribers who benefited from the Oct 25, 2022 analysis suggesting early signs of a major bottom forming.](#) The weekly RSI, Stochastics and MACD are rallying. I am looking to go long in the green zone (of the daily chart), targeting the red zone for Wednesday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

FACTSET

FINANCIAL TIMES

ALPHAVILLE

GBPUSD

The GBPUSD is edging higher and appears to have a bit more upside before bumping up against the August high and upchannel resistance (on the daily chart). With the GBPUSD having completed a major bottom, any profit-taking next week is unlikely to break below upchannel support (on the daily chart) coinciding roughly with the September high. Odds are decent for a weekly close above the psychologically key 1.20 whole figure level. Watch for volatility with any of today's 830am EST US core PCE price index and 10am EST ISM manufacturing PMI data and Friday following the US Non-Farm Payrolls (NFP), earnings and unemployment data. The escalation in the Ukraine-Russia conflict deserves close monitoring. The weekly RSI, Stochastics and MACD are rallying or consolidating recent gains, weighed by the overbought weekly Stochastics. I am looking to go long in the green zone (of the daily chart), targeting the red zone for Wednesday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

Weekly/Daily/4hr

SILVER (SI)

Silver (SI) is consolidating after yesterday's massive 3% plus surge to the November high. Although further healthy profittaking can be expected ahead of the weekend, odds are now elevated for a test of the May high (coinciding roughly with upchannel resistance on the daily chart) in the next week or so. With SI comfortably above the 50% Fib retrace of the March to September slide, SI has completed a major bottom within the consolidation since August 2020 (as can be seen more easily on a monthly chart on tradingview.com). Odds are now moderate for a test of the May high before year end. Volatility can be expected with any of today's 830am EST US core PCE price index and 10am EST ISM manufacturing PMI data and Friday following the US Non-Farm Payrolls (NFP), earnings and unemployment data. The escalation in the Ukraine-Russia conflict deserves close monitoring. [Congratulations to paying subscribers who benefited from the Nov 2, 2022 analysis suggesting that SI was in the advanced stages of forming a major bottom](#). The weekly and daily RSI, Stochastics and MACD are bottomish, rallying or consolidating recent gains. I am looking to enter long in the green zone (of the daily chart), targeting the red zone for Wednesday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

We use machine learning to create trading signals and generate consistent alpha (market outperformance) since 2020.

Strategies Summary

- 9 active models based on AI/ML
- Trades spot (live since Nov 2020) and futures (in testing, ETA Dec 2022)
- Trades highly liquid markets (BTC, ETH, BNB, etc.)
- Model input: Market data (OHLCV)
- Model output: BUY/SELL/HOLD + % portfolio
- Trade frequency: 4-10 trades per week (8-10x AUM/mo)

Technology Summary

- Developed in-house, proprietary
- Not a rule-based algo
- Cutting edge neural network architectures (LSTM, GRU, Performer (Transformer), GMLP, Filter)
- Self-learning and adaptive (uses reinforcement learning)
- Scalable to other markets
- Difficult to replicate

CRYPTO WEEKLY OUTLOOK

ETHEREUM + INDUSTRY FUNDAMENTALS + BITCOIN + RIPPLE

ETHEREUM (ETHUSD)

Nov 28, 2021

Ethereum (ETHUSD) is deepening in its correction, and appears poised to slide further this week. Significantly, ETHUSD is at high risk of exceeding the September pullback in magnitude, following in Bitcoin (BTCUSD)'s footsteps. The current 2 week downturn is testing the psychologically key 4k whole figure level, and appears to be gravitating towards an uptrend support line (on the weekly chart) connecting the July and September lows. Odds are elevated for a test of the 50% Fib retrace of the July to October rally sometime in December. ETHUSD's correlation to BTCUSD (on a weekly chart) is at 0.95, near the upper end of its 5 year range. [Congratulations to readers alerted August 1st of the completion of the major June-July bottom](#), and to those who heeded [the warning May 16th of the major top forming](#). The weekly RSI, Stochastics and MACD are tiring, weighing on the attempting to bottom daily RSI and Stochastics. I am likely going to remain flat this week but would consider going long in the 3000-3300 range, targeting a 3000-4000 range for December.

COFFEE DAILY

Jan 2, 2022

ROBUSTA COFFEE (RC)

Robusta Coffee (RC) edged lower Friday, closing 2021 just below the fresh year high. Significantly, with the new year beginning, odds are high after last year's strong bull market for RC to at least see a healthy correction. RC is bumping up against upchannel resistance (on the weekly chart), with some hesitation late last week as seen by the 2 consecutive daily Dojis. Any test of the psychologically key 2500 whole figure level will likely have to wait until at least Feb February. The weekly and daily RSI, Stochastics and MACD are rallying or consolidating recent gains. I am looking at entering long in the green zone of the daily chart (in the ~2270-2330 range), targeting the red zone (of the daily chart in the ~2400-2450 range) for Friday. The amber/yellow zone (in the ~2190-2240 range) is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).
