TODAY'S TOP 3 TRADES

Dec 28, 2022

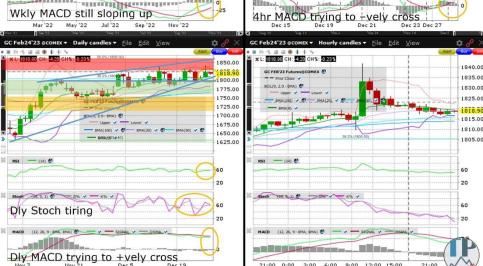

METALS/ENERGY (GOLD, WTI CRUDE) + TODAY'S TOP TRADE (NASDAQ100) GOLD (GC)

Gold (GC) continues in its month long consolidation after pushing to a fresh December high yesterday. Regardless of the low liquidity in this holiday shortened week, odds are decent going into mid next week for GC to extend its ascending wedge (on the daily chart) and to resume its Bull Flag (on the weekly chart). GC is now comfortably above the 38.2% Fib retrace of the March to October slide and downchannel resistance (on the weekly chart). GC is all but assured a weekly close above the psychologically key 1800 whole figure level, with a moderate probability of a test of the 50% Fib by next week sometime. GC has completed a major bottom within the consolidation since August 2020 (as can be seen more easily on a monthly chart on tradingview.com). The escalation in the Ukraine-Russia conflict deserves close monitoring. Congratulations to paying subscribers who benefited from the Nov 2, 2022 analysis suggesting that SI was in the early stages of forming a major bottom. The weekly and daily RSI, Stochastics and MACD are bottomish, rallying or consolidating recent gains. I am looking to enter long in the green zone (of the daily chart), targeting the red zone for Wednesday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter). Hope you're enjoying the holiday season, and have a fantastic 2023 ahead! Click here for analysis on S&P500, SILVER

ETHEREUM (ETHUSD)

Nov 28, 2021

Ethereum (ETHUSD) is deepening in its correction, and appears poised to slide further this week. Significantly, ETHUSD is at high risk of exceeding the September pullback in magnitude, following in Bitcoin (BTCUSD)'s footsteps. The current 2 week downturn is testing the psychologically key 4k whole figure level, and appears to be gravitating towards an uptrend support line (on the weekly chart) connecting the July and September lows. Odds are elevated for a test of the 50% Fib retrace of the July to October rally sometime in December. ETHUSD's correlation to BTCUSD (on a weekly chart) is at 0.95, near the upper end of its 5 year range. Congratulations to readers alerted August 1st of the completion of the major June-July bottom, and to those who heeded the warning May 16th of the major top forming. The weekly RSI, Stochastics and MACD are tiring, weighing on the attempting to bottom daily RSI and Stochastics. I am likely going to remain flat this week but would consider going long in the 3000-3300 range, targeting a 3000-4000 range for December.

COFFEE DAILY

Jan 2, 2022

ROBUSTA COFFEE (RC)

Robusta Coffee (RC) edged lower Friday, closing 2021 just below the fresh year high. Significantly, with the new year beginning, odds are high after last year's strong bull market for RC to at least see a healthy correction. RC is bumping up against upchannel resistance (on the weekly chart), with some hesitation late last week as seen by the 2 consecutive daily Dojis. Any test of the psychologically key 2500 whole figure level will likely have to wait until at least February. The weekly and daily RSI, Stochastics and MACD are rallying or consolidating recent gains. I am looking at entering long in the green zone of the daily chart (in the ~2270-2330 range), targeting the red zone (of the daily chart in the ~2400-2450 range) for Friday. The amber/yellow zone (in the ~2190-2240 range) is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).
