

TODAY'S TOP 3 TRADES

Dec 8, 2022

FX (USDCAD, GBPAUD) + TODAY'S TOP TRADE (NASDAQ100)

USDCAD

The USDCAD has bounced strongly off the November low, and is suddenly testing the 61.8% Fib retrace of the October to November slide. For now, the USDCAD appears to want to complete the Bull Flag consolidation since the October high, and retest the 2022 high and the psychologically key 1.40 whole figure level by January sometime. Although unlikely, any slide before year end below uptrend support (on the weekly chart) will dramatically increase the odds for a major trend reversal. Volatility will surge Friday with the US' core PPI and PPI, and preliminary UoM consumer sentiment. The escalation in the Ukraine-Russia conflict deserves close monitoring. The weekly and daily RSI, Stochastics and MACD are bottomish or rallying. I am looking to enter long in the green zone (of the daily chart), targeting the red zone for Wednesday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

FACTSET

FINANCIAL TIMES

ALPHAVILLE

GBPAUD

The GBPAUD is consolidating for a 3rd straight day near the highest level since mid March. Although likely to further digest ahead of the weekend, the gains off the November low, the GBPAUD appears poised to retest the psychologically key 1.85 whole figure level by year end. The escalation in the Ukraine-Russia conflict deserves close monitoring. Congratulations to paying subscribers who benefited from the [Oct 4, 2022 analysis highlighting the high odds for a continued downtrend reversal going into year end](#). The weekly RSI, Stochastics and MACD are rallying or consolidating recent gains. I am looking to enter long in the green zone (of the daily chart), targeting the red zone for Wednesday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

Weekly/Daily/4hr

NASDAQ100 (NQ)

Nasdaq100 (NQ) is showing fatigue in its Dead Cat Bounce off the October low, sliding back below the 38.2% Fib retrace of the August to October slide. Odds are fairly low for NQ to extend higher within its Oct-Nov Dead Cat Bounce before the Xmas lull to the 61.8% Fib or the weekly chart downtrend/descending wedge resistance. Volatility will surge Friday with the US' core PPI and PPI, and preliminary UoM consumer sentiment. The escalation in the Ukraine-Russia conflict deserves close monitoring. Congratulations to paying subscribers who benefited from [the Oct 18, 2022 analysis highlighting the early stages of a month plus Dead Cat Bounce](#), [the Jan 18, 2022 warning of the NQ keeling over on a monthly chart](#), [the alert February 18th, 2020 one day before the record high in the S&P500](#), [warning of a pending slide in the Nasdaq100](#) and from [the March 24th, 2020 report highlighting the looming multi-day to multi-week rebound in NQ](#). The tiring weekly RSI and Stochastics are weighing on the still upsloping weekly MACD. I am looking to enter short in the red zone (of the daily chart), targeting the green zone for Wednesday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

We use machine learning to create trading signals and generate consistent alpha (market outperformance) since 2020.

Strategies Summary

- 9 active models based on AI/ML
- Trades spot (live since Nov 2020) and futures (in testing, ETA Dec 2022)
- Trades highly liquid markets (BTC, ETH, BNB, etc.)
- Model input: Market data (OHLCV)
- Model output: BUY/SELL/HOLD + % portfolio
- Trade frequency: 4-10 trades per week (8-10x AUM/mo)

Technology Summary

- Developed in-house, proprietary
- Not a rule-based algo
- Cutting edge neural network architectures (LSTM, GRU, Performer (Transformer), GMLP, Filter)
- Self-learning and adaptive (uses reinforcement learning)
- Scalable to other markets
- Difficult to replicate

CRYPTO WEEKLY OUTLOOK

ETHEREUM + INDUSTRY FUNDAMENTALS + BITCOIN + RIPPLE

ETHEREUM (ETHUSD)

Nov 28, 2021

Ethereum (ETHUSD) is deepening in its correction, and appears poised to slide further this week. Significantly, ETHUSD is at high risk of exceeding the September pullback in magnitude, following in Bitcoin (BTCUSD)'s footsteps. The current 2 week downturn is testing the psychologically key 4k whole figure level, and appears to be gravitating towards an uptrend support line (on the weekly chart) connecting the July and September lows. Odds are elevated for a test of the 50% Fib retrace of the July to October rally sometime in December. ETHUSD's correlation to BTCUSD (on a weekly chart) is at 0.95, near the upper end of its 5 year range. [Congratulations to readers alerted August 1st of the completion of the major June-July bottom](#), and to those who heeded [the warning May 16th of the major top forming](#). The weekly RSI, Stochastics and MACD are tiring, weighing on the attempting to bottom daily RSI and Stochastics. I am likely going to remain flat this week but would consider going long in the 3000-3300 range, targeting a 3000-4000 range for December.

COFFEE DAILY

Jan 2, 2022

ROBUSTA COFFEE (RC)

Robusta Coffee (RC) edged lower Friday, closing 2021 just below the fresh year high. Significantly, with the new year beginning, odds are high after last year's strong bull market for RC to at least see a healthy correction. RC is bumping up against upchannel resistance (on the weekly chart), with some hesitation late last week as seen by the 2 consecutive daily Dojis. Any test of the psychologically key 2500 whole figure level will likely have to wait until at least Feb February. The weekly and daily RSI, Stochastics and MACD are rallying or consolidating recent gains. I am looking at entering long in the green zone of the daily chart (in the ~2270-2330 range), targeting the red zone (of the daily chart in the ~2400-2450 range) for Friday. The amber/yellow zone (in the ~2190-2240 range) is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).
