

## TODAY'S TOP 3 TRADES

Dec 13, 2022

**INDICES (VIX, NASDAQ100) + TODAY'S TOP TRADE (GBPAUD)**

**VIX (VX)**

The VIX (VX) is trying to form a major bottom by bouncing off near the 2022 low. With the VX consolidating just above downchannel resistance (on the daily chart), odds are rising for a weekly close above descending wedge/downchannel resistance (on the weekly chart). There is now a moderate probability of a test of the psychologically key 25 whole figure level before the Xmas lull sets in. Bullish catalysts may arrive today 830am EST with the US' CPI data and Wednesday following the highly anticipated US' FOMC, Fed rate announcement and FOMC conference. The slew of economic news continues Thursday with the US' retail sales and Empire State manufacturing index, and Friday with the US' Flash services PMI. The escalation in the Ukraine-Russia conflict deserves close monitoring. [Congratulations to premium subscribers who benefited from the March 17, 2020 warning of the pending slide in the VIX, one day before its record high on the front month contract](#), or more recently from the [Nov 30, 2021 alert of the growing probability of a rebound in the VIX](#) and repeated [Jan 18, 2022](#). Except for the still downsloping weekly MACD, the weekly, daily and 4hr RSI, Stochastics and MACD are bottomish, rallying or consolidating recent gains. I am looking to enter long in the green zone (of the daily chart), targeting the red zone for Thursday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

## NASDAQ100 (NQ)

Nasdaq100 (NQ) is making another attempt at extending the Dead Cat Bounce (off the October low), with odds elevated for a retest this week of the December high. Nevertheless, NQ does not appear likely to reach the 61.8% Fib or the weekly chart downtrend/descending wedge resistance before the Xmas lull sets in. Watch for volatility today at 830am EST with the US' CPI data and Wednesday following the highly anticipated US' FOMC, Fed rate announcement and FOMC conference. The slew of economic news continues Thursday with the US' retail sales and Empire State manufacturing index, and Friday with the US' Flash services PMI. The escalation in the Ukraine-Russia conflict deserves close monitoring. Congratulations to paying subscribers who benefited from [the Oct 18, 2022 analysis highlighting the early stages of a month plus Dead Cat Bounce](#), [the Jan 18, 2022 warning of the NQ keeling over on a monthly chart](#), [the alert February 18th, 2020 one day before the record high in the S&P500](#), [warning of a pending slide in the Nasdaq100](#) and from [the March 24th, 2020 report highlighting the looming multi-day to multi-week rebound in NQ](#). The weekly, daily and 4hr RSI, Stochastics and MACD are rallying, bottomish or consolidating recent gains. I am looking to enter short in the red zone (of the daily chart), targeting the green zone for Monday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

## GBPAUD

The GBPAUD is consolidating after yesterday's surge, and appears to be in the advanced stages of completing a consolidation near the November high. With the GBPAUD back above the 61.8% Fib retrace of the February to September slide, odds are moderately high for the GBPAUD to retest the psychologically key 1.85 whole figure level by year end. A bullish catalyst may arrive as early as today with the UK's claimant count change at 2am EST, and at 6am EST with BoE Governor Bailey's comments. Traders are highly anticipating RBA Governor Lowe's comments on Wednesday, along with the UK's CPI data. The slew of economic news continues Thursday with Australia's employment data, and the UK's MPC official bank rate votes, monetary policy summary and official bank rate. To end the week will be the release Friday of the UK's Flash manufacturing and services PMI. The escalation in the Ukraine-Russia conflict deserves close monitoring. Congratulations to paying subscribers who benefited from the [Oct 4, 2022 analysis highlighting the high odds for a continued downtrend reversal going into year end](#). The weekly, daily and 4hr RSI, Stochastics and MACD are rallying or consolidating recent gains. I am looking to enter long in the green zone (of the daily chart), targeting the red zone for Monday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

## CRYPTO WEEKLY OUTLOOK

ETHEREUM + INDUSTRY FUNDAMENTALS + BITCOIN + RIPPLE

### ETHEREUM (ETHUSD)

Nov 28, 2021

Ethereum (ETHUSD) is deepening in its correction, and appears poised to slide further this week. Significantly, ETHUSD is at high risk of exceeding the September pullback in magnitude, following in Bitcoin (BTCUSD)'s footsteps. The current 2 week downturn is testing the psychologically key 4k whole figure level, and appears to be gravitating towards an uptrend support line (on the weekly chart) connecting the July and September lows. Odds are elevated for a test of the 50% Fib retracement of the July to October rally sometime in December. ETHUSD's correlation to BTCUSD (on a weekly chart) is at 0.95, near the upper end of its 5 year range. [Congratulations to readers alerted August 1st of the completion of the major June-July bottom](#), and to those who heeded [the warning May 16th of the major top forming](#). The weekly RSI, Stochastics and MACD are tiring, weighing on the attempting to bottom daily RSI and Stochastics. I am likely going to remain flat this week but would consider going long in the 3000-3300 range, targeting a 3000-4000 range for December.

# COFFEE DAILY

Jan 2, 2022

## ROBUSTA COFFEE (RC)

Robusta Coffee (RC) edged lower Friday, closing 2021 just below the fresh year high. Significantly, with the new year beginning, odds are high after last year's strong bull market for RC to at least see a healthy correction. RC is bumping up against upchannel resistance (on the weekly chart), with some hesitation late last week as seen by the 2 consecutive daily Dojis. Any test of the psychologically key 2500 whole figure level will likely have to wait until at least February. The weekly and daily RSI, Stochastics and MACD are rallying or consolidating recent gains. I am looking at entering long in the green zone of the daily chart (in the ~2270-2330 range), targeting the red zone (of the daily chart in the ~2400-2450 range) for Friday. The amber/yellow zone (in the ~2190-2240 range) is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).
