

TODAY'S TOP 3 TRADES

Jan 6, 2022

INDICES (NASDAQ100, S&P500) + TODAY'S TOP TRADE (NATURAL GAS)

NASDAQ100 (NQ)

Nasdaq100 (NQ) is at elevated risk of a descending wedge extension (on the 4hr and weekly chart) in the next week. NQ appears less likely to bounce back by late January to descending wedge resistance (on the weekly chart) than it is to break in the same period below the 2022 low to wedge support. Watch for volatility today 830am EST with the highly anticipated US non-farm payrolls (NFP) and on the 10am EST release of the US ISM services PMI. Monitor as usual the Ukraine-Russia conflict. Congratulations to paying subscribers who benefited from [the Oct 18, 2022 analysis highlighting the early stages of a month plus Dead Cat Bounce](#), [the Jan 18, 2022 warning of the NQ keeling over on a monthly chart](#), [the alert February 18th, 2020 one day before the record high in the S&P500](#), [warning of a pending slide in the Nasdaq100](#) and from [the March 24th, 2020 report highlighting the looming multi-day to multi-week rebound in NQ](#). The downsloping weekly Stochastics and MACD are weighing on the bottomish daily RSI, Stochastics and MACD. I am looking to enter short in the red zone (of the daily chart), targeting the green zone for Thursday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

S&P500 (ES)

The S&P500 (ES) is looking wobbly to start 2023, with the slide from the December high increasingly likely to extend in the next week or so. Any break to a fresh January low by the weekend will dramatically increase odds for a slide back to the 2022 low by late January. Watch for volatility today 830am EST with the highly anticipated US non-farm payrolls (NFP) and on the 10am EST release of the US ISM services PMI. Monitor as usual the Ukraine-Russia conflict. Congratulations to paying subscribers who benefited from [the Oct 18, 2022 analysis highlighting the early stages of a month plus Dead Cat Bounce](#), or from [the February 18, 2020 analysis one day before the record high in the ES, warning of the pending slide in the S&P500](#). The tiring weekly Stochastics and MACD are weighing on the bottomish daily RSI, Stochastics and MACD. I am looking to enter short in the red zone (of the daily chart), targeting the green zone for Thursday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

Weekly/Daily/4hr

NATURAL GAS (NG)

Natural Gas (NG) is trying to firm after yesterday's massive near 10% slide yesterday, but remains precarious to a further extension lower in the next week or so towards downchannel support (on the 4hr, daily and weekly chart). Nevertheless, with NG testing the 2022 low (as can be seen more easily on a monthly chart on tradingview.com), NG may rebound strongly sooner. The break below the psychologically key 4 whole figure level may very well have been an overshoot. Closely monitor the escalation in the Ukraine-Russia conflict. Congratulations to Premium Members who benefited from the opportunities highlighted [Jan 19, 2022](#), [Jan 27, 2021](#) and [April 14, 2021](#). The weekly RSI and MACD are steadily sloping down, weighing on the bottomish daily RSI and Stochastics. I am looking to enter long in the green zone (of the daily chart), targeting the red zone for Thursday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

CRYPTO WEEKLY OUTLOOK

ETHEREUM + INDUSTRY FUNDAMENTALS + BITCOIN + RIPPLE

ETHEREUM (ETHUSD)

Nov 28, 2021

Ethereum (ETHUSD) is deepening in its correction, and appears poised to slide further this week. Significantly, ETHUSD is at high risk of exceeding the September pullback in magnitude, following in Bitcoin (BTCUSD)'s footsteps. The current 2 week downturn is testing the psychologically key 4k whole figure level, and appears to be gravitating towards an uptrend support line (on the weekly chart) connecting the July and September lows. Odds are elevated for a test of the 50% Fib retrace of the July to October rally sometime in December. ETHUSD's correlation to BTCUSD (on a weekly chart) is at 0.95, near the upper end of its 5 year range. [Congratulations to readers alerted August 1st of the completion of the major June-July bottom](#), and to those who heeded [the warning May 16th of the major top forming](#). The weekly RSI, Stochastics and MACD are tiring, weighing on the attempting to bottom daily RSI and Stochastics. I am likely going to remain flat this week but would consider going long in the 3000-3300 range, targeting a 3000-4000 range for December.

COFFEE DAILY

Jan 2, 2022

ROBUSTA COFFEE (RC)

Robusta Coffee (RC) edged lower Friday, closing 2021 just below the fresh year high. Significantly, with the new year beginning, odds are high after last year's strong bull market for RC to at least see a healthy correction. RC is bumping up against upchannel resistance (on the weekly chart), with some hesitation late last week as seen by the 2 consecutive daily Dojis. Any test of the psychologically key 2500 whole figure level will likely have to wait until at least Feb February. The weekly and daily RSI, Stochastics and MACD are rallying or consolidating recent gains. I am looking at entering long in the green zone of the daily chart (in the ~2270-2330 range), targeting the red zone (of the daily chart in the ~2400-2450 range) for Friday. The amber/yellow zone (in the ~2190-2240 range) is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).
