TODAY'S TOP 3 TRADES

Jan 25, 2022

METALS/ENERGY (WTI CRUDE, NATURAL GAS) + TODAY'S TOP TRADE (WHEAT) WTI CRUDE (CL)

WTI Crude (CL) is vulnerable to sliding to below the psychologically key 80 whole figure level today following the highly anticipated weekly inventory data at 1030am EST. The rejection this week so far at downchannel resistance (on the weekly chart) just below the 38.2% Fib retrace of the slide from the 2022 high in June to the December low suggests higher odds of retesting of the January low before month end than for a break above the December high during the same period. Monitor as usual the escalation in the Ukraine-Russia conflict. [Congratulations to readers who heeded the August 4, 2021 warning of CL's vulnerability](#), and to [Premium Members who benefited from the bullish triangle breakout highlighted Nov 18, 2020](#). The weekly RSI, Stochastics and MACD are bottomish or consolidating recent gains. I am looking at entering long in the green zone (of the daily chart), targeting the red zone for Tuesday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

NATURAL GAS (NG)

Natural Gas (NG) is nearing Friday's fresh 2023 low, just barely above the psychologically key 3 whole figure level. Odds are moderate and rising that NG will following Thursday's highly anticipated weekly storage data, mount a short-covering rally as it has become oversold with the 7th straight red weekly candle trying to form. A break above the 4hr chart downchannel resistance will coincide with a bullish resolution to the daily chart descending wedge. Nevertheless, bulls should not rule out a test of downchannel support (on the weekly chart) and the psychologically key 2 whole figure level sometime in February. Monitor as usual the escalation in the Ukraine-Russia conflict. Congratulations to Premium Members who benefited from the opportunities highlighted [Jan 19, 2022](#), [Jan 27, 2021](#) and [April 14, 2021](#). The still downsloping weekly RSI, Stochastics and MACD are weighing on the positively crossing daily MACD. I am looking to enter long in the green zone (of the daily chart), targeting the red zone for Tuesday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

Weekly/Daily/4hr

WHEAT (ZW)

Wheat (ZW) is trying to hold just above descending wedge support (on the weekly chart) as seen by the 3rd consecutive weekly Hammer or Gravestone trying to form. Nevertheless, with ZW below the 61.8% Fib retrace of the September 2016 to March 2022 bull market (as can be seen on a monthly chart on tradingview.com), odds are moderate for a sliding back to the 2021 low just below the psychologically key 600 whole figure level sometime in Q1. ZW will need a weekly close above descending wedge resistance (on the weekly chart) to neutralize the still somewhat bearish longer term momentum. Monitor as usual the escalation in the Ukraine-Russia conflict. [Congratulations to Premium Members alerted Feb 14, 2022 to the looming resumption in the major uptrend and who benefited](#), along with those who took advantage of [the Aug 21, 2020 highlighting of ZW's major bottoming effort](#). The weekly, daily and 4hr RSI, Stochastics and MACD are bottomish or rallying. I am looking to go long in the green zone (of the daily chart), targeting the red zone for Tuesday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

CRYPTO WEEKLY OUTLOOK

ETHEREUM + INDUSTRY FUNDAMENTALS + BITCOIN + RIPPLE

ETHEREUM (ETHUSD)

Nov 28, 2021

Ethereum (ETHUSD) is deepening in its correction, and appears poised to slide further this week. Significantly, ETHUSD is at high risk of exceeding the September pullback in magnitude, following in Bitcoin (BTCUSD)'s footsteps. The current 2 week downturn is testing the psychologically key 4k whole figure level, and appears to be gravitating towards an uptrend support line (on the weekly chart) connecting the July and September lows. Odds are elevated for a test of the 50% Fib retrace of the July to October rally sometime in December. ETHUSD's correlation to BTCUSD (on a weekly chart) is at 0.95, near the upper end of its 5 year range. [Congratulations to readers alerted August 1st of the completion of the major June-July bottom](#), and to those who heeded [the warning May 16th of the major top forming](#). The weekly RSI, Stochastics and MACD are tiring, weighing on the attempting to bottom daily RSI and Stochastics. I am likely going to remain flat this week but would consider going long in the 3000-3300 range, targeting a 3000-4000 range for December.

COFFEE DAILY

Jan 2, 2022

ROBUSTA COFFEE (RC)

Robusta Coffee (RC) edged lower Friday, closing 2021 just below the fresh year high. Significantly, with the new year beginning, odds are high after last year's strong bull market for RC to at least see a healthy correction. RC is bumping up against upchannel resistance (on the weekly chart), with some hesitation late last week as seen by the 2 consecutive daily Dojis. Any test of the psychologically key 2500 whole figure level will likely have to wait until at least Feb February. The weekly and daily RSI, Stochastics and MACD are rallying or consolidating recent gains. I am looking at entering long in the green zone of the daily chart (in the ~2270-2330 range), targeting the red zone (of the daily chart in the ~2400-2450 range) for Friday. The amber/yellow zone (in the ~2190-2240 range) is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).
