

TODAY'S TOP 3 TRADES

Feb 20, 2023

AGRIS (CORN, WHEAT) + TODAY'S TOP TRADE (VIX) CORN (ZC)

Corn (ZC) edged higher Friday ahead of today's US Presidents Day holiday, but is about to see a volatility spike with the triangle (on the weekly chart) near complete. Any break above the January high would dramatically increase odds of testing the psychologically key 700 whole figure level and November high in the few days after. In the meantime, odds remain moderate for a test of the January low before month end. The escalation in the Ukraine-Russia conflict deserves close monitoring. [Congratulations to Premium Members who benefited from the May 28, 2020 alert to ZC's major bottoming effort](#) and again on [Aug 24, 2020](#). The weekly RSI, Stochastics and MACD are bottomish or consolidating recent gains, but weighed by the still downsloping daily MACD. I am looking to go long in the green zone (of the daily chart), targeting the red zone for Monday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

WHEAT (ZW)

Wheat (ZW) consolidated last week after briefly breaking December's high, remaining vulnerable to sliding further this week following today's US Presidents Day holiday. Nevertheless, ZW has made progress in halting the bear trend since the May high, with any bounce off upchannel support (on the 4hr chart) early week likely to be followed in the days after by a test of the psychologically key 800 whole figure level. ZW's slide beneath the 61.8% Fib retrace (at ~758) of the September 2016 to March 2022 bull market (as can be seen on a monthly chart on tradingview.com) appears to have been an overshoot. The escalation in the Ukraine-Russia conflict deserves close monitoring. [Congratulations to Premium Members alerted Feb 14, 2022 to the looming resumption in the major uptrend and who benefited](#), along with those who took advantage of [the Aug 21, 2020 highlighting of ZW's major bottoming effort](#). The weekly RSI, Stochastics and MACD are bottomish or consolidating recent gains, but weighed by the tiring daily Stochastics and MACD. I am looking to go long in the green zone (of the daily chart), targeting the red zone for Monday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

Weekly/Daily/4hr

VIX (VX)

The VIX (VX) is consolidating to start the week, retesting downchannel resistance (on the weekly chart). Although any testing of the psychologically key 25 whole figure level and January high appears more likely for March (than the balance of February), volatility will surge Tuesday with data on the US Flash services PMI, Wednesday with the US FOMC meeting minutes, Thursday with the US GDP, and Friday with the US core PCE price index. The escalation in the Ukraine-Russia conflict deserves close monitoring. [Congratulations to premium subscribers who benefited from the March 17, 2020 warning of the pending slide in the VX, one day before its record high on the front month contract](#), or more recently from the [Nov 30, 2021 alert of the growing probability of a rebound in the VIX](#) and repeated [Jan 18, 2022](#). The weekly and daily RSI, Stochastics and MACD are bottomish, rallying or consolidating recent gains. I am looking to enter long in the green zone (of the daily chart), targeting the red zone for Friday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

Crypto Weekly Outlook offers technical Analysis for 10 coins from the top 50 in market cap that are most interesting for the coming week from a TA standpoint.

[Sample with Fundamental analysis on ETHUSD, BTCUSD and on the industry from Nov 28, 2021 right before a deepening in the crypto market correction.](#)

CRYPTO WEEKLY OUTLOOK

ETHEREUM + INDUSTRY FUNDAMENTALS + BITCOIN + RIPPLE

ETHEREUM (ETHUSD)

Nov 28, 2021

Ethereum (ETHUSD) is deepening in its correction, and appears poised to slide further this week. Significantly, ETHUSD is at high risk of exceeding the September pullback in magnitude, following in Bitcoin (BTCUSD)'s footsteps. The current 2 week downturn is testing the psychologically key 4k whole figure level, and appears to be gravitating towards an uptrend support line (on the weekly chart) connecting the July and September lows. Odds are elevated for a test of the 50% Fib retrace of the July to October rally sometime in December. ETHUSD's correlation to BTCUSD (on a weekly chart) is at 0.95, near the upper end of its 5 year range. [Congratulations to readers alerted August 1st of the completion of the major June-July bottom](#), and to those who heeded [the warning May 16th of the major top forming](#). The weekly RSI, Stochastics and MACD are tiring, weighing on the attempting to bottom daily RSI and Stochastics. I am likely going to remain flat this week but would consider going long in the 3000-3300 range, targeting a 3000-4000 range for December.

COFFEE DAILY

Jan 2, 2022

ROBUSTA COFFEE (RC)

Robusta Coffee (RC) edged lower Friday, closing 2021 just below the fresh year high. Significantly, with the new year beginning, odds are high after last year's strong bull market for RC to at least see a healthy correction. RC is bumping up against upchannel resistance (on the weekly chart), with some hesitation late last week as seen by the 2 consecutive daily Dojis. Any test of the psychologically key 2500 whole figure level will likely have to wait until at least Feb February. The weekly and daily RSI, Stochastics and MACD are rallying or consolidating recent gains. I am looking at entering long in the green zone of the daily chart (in the ~2270-2330 range), targeting the red zone (of the daily chart in the ~2400-2450 range) for Friday. The amber/yellow zone (in the ~2190-2240 range) is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).
