Mar 9, 2023

FX (GBPAUD, USDCAD) + TODAY'S TOP TRADE (NATURAL GAS)

GBPAUD

The GBPAUD is hesitating within a key bull-bear battleground, testing the psychologically key 1.80 whole figure level, 2023 high and ascending triangle resistance (on the 4hr chart). Odds appear elevated for a surge in March to the December high and major downchannel resistance since March 2020 (as can be seen easier on a monthly chart on tradingview.com). A bullish catalyst may arrive as early as Friday with the UK GDP. The escalation in the Ukraine-Russia conflict deserves close monitoring. Congratulations to paying subscribers who benefited from the [Oct 4, 2022 analysis highlighting the high odds for a continued downtrend reversal going into year end](#). The weekly and daily RSI, Stochastics and MACD are bottomish, rallying or consolidating recent gains. I am long as of today at 1.7984 although if I were flat, I'd look to enter long in the green zone (of the daily chart), targeting the red zone for Wednesday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

USDCAD

The USDCAD is consolidating after the strong gains off the Tuesday low, hesitating as it nears upchannel resistance (on the 4hr and daily chart). Regardless of any healthy profit-taking before the weekend, odds are elevated for a test of the psychologically key 1.40 whole figure level and 2022 high in March. Watch for volatility Friday with the highly anticipated Canadian and US employment data, including the US Non-Farm Payrolls (NFP). The escalation in the Ukraine-Russia conflict deserves close monitoring. The weekly and daily RSI, Stochastics and MACD are bottomish, rallying or consolidating recent gains. I am looking to enter long in the green zone (of the daily chart), targeting the red zone for Wednesday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

Weekly/Daily/4hr

NATURAL GAS (NG)

Natural Gas (NG) continues consolidating after the strong profittaking from the psychologically key 3 whole figure level briefly reached Friday. Although NG has unwound most of last week's gains, it has made progress in its major bottoming near downchannel support (on the weekly chart). Key for bulls will be NG's ability to form a higher March low versus the February low, reinforcing the already higher March high versus February high. NG appears less likely in the day following today's highly anticipated weekly storage at 1030am EST to retest the 2023 low (formed in February), as it does to retest last week's high. Monitor as usual the escalation in the Ukraine-Russia conflict. Congratulations to Premium Members who benefited from the opportunities highlighted [Jan 19, 2022](#), [Jan 27, 2021](#) and [April 14, 2021](#). The weekly RSI, Stochastics and MACD are bottomish, but weighed by the tiring daily MACD. I am looking to enter long in the green zone (of the daily chart), targeting the red zone for Wednesday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

Crypto Weekly Outlook offers technical Analysis for 10 coins from the top 50 in market cap that are most interesting for the coming week from a TA standpoint.

[Sample with Fundamental analysis on ETHUSD, BTCUSD and on the industry from Nov 28, 2021 right before a deepening in the crypto market correction.](#)

CRYPTO WEEKLY OUTLOOK

ETHEREUM + INDUSTRY FUNDAMENTALS + BITCOIN + RIPPLE

ETHEREUM (ETHUSD)

Nov 28, 2021

Ethereum (ETHUSD) is deepening in its correction, and appears poised to slide further this week. Significantly, ETHUSD is at high risk of exceeding the September pullback in magnitude, following in Bitcoin (BTCUSD)'s footsteps. The current 2 week downturn is testing the psychologically key 4k whole figure level, and appears to be gravitating towards an uptrend support line (on the weekly chart) connecting the July and September lows. Odds are elevated for a test of the 50% Fib retrace of the July to October rally sometime in December. ETHUSD's correlation to BTCUSD (on a weekly chart) is at 0.95, near the upper end of its 5 year range. [Congratulations to readers alerted August 1st of the completion of the major June-July bottom](#), and to those who heeded [the warning May 16th of the major top forming](#). The weekly RSI, Stochastics and MACD are tiring, weighing on the attempting to bottom daily RSI and Stochastics. I am likely going to remain flat this week but would consider going long in the 3000-3300 range, targeting a 3000-4000 range for December.

COFFEE DAILY

Jan 2, 2022

ROBUSTA COFFEE (RC)

Robusta Coffee (RC) edged lower Friday, closing 2021 just below the fresh year high. Significantly, with the new year beginning, odds are high after last year's strong bull market for RC to at least see a healthy correction. RC is bumping up against upchannel resistance (on the weekly chart), with some hesitation late last week as seen by the 2 consecutive daily Dojis. Any test of the psychologically key 2500 whole figure level will likely have to wait until at least Feb February. The weekly and daily RSI, Stochastics and MACD are rallying or consolidating recent gains. I am looking at entering long in the green zone of the daily chart (in the ~2270-2330 range), targeting the red zone (of the daily chart in the ~2400-2450 range) for Friday. The amber/yellow zone (in the ~2190-2240 range) is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).
