

## COFFEE DAILY

Mar 24, 2023

### ROBUSTA COFFEE (RC)

Robusta Coffee (RC) edged higher yesterday with a close at downchannel resistance (on the 4hr chart) and its daily Hammer near triangle resistance (on the daily chart). RC appears to have halted the slide from the February high with the current weekly candle having reversed much of last week's losses. The bounce that began Monday kicked off from just above the February low, the psychologically key 2000 whole figure level, the 38.2% Fib retrace of the January to February rally and prior downchannel resistance (on the weekly chart). Any recapture of the March high will suggest a readiness to conclude the massive Bull Flag consolidation since late 2021 (seen easier on a monthly chart on [tradingview.com](https://tradingview.com)). The weekly, daily and 4hr RSI, Stochastics and MACD are bottomish, rallying or consolidating recent gains. I am looking at entering long in the green zone of the daily chart (in the ~2045-2120 range), targeting the red zone (of the daily chart in the ~2170-2220 range) for Thursday. The amber/yellow zone (in the ~1950-2025 range) is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

## ARABICA COFFEE (KC)

Arabica Coffee (KC) slid more than 2% yesterday, closing near the March low under the prior 4hr chart downchannel resistance. With the current weekly candle turning into a red weekly Gravestone after getting rejected at downchannel resistance (on the weekly chart), KC suddenly appears at vulnerable to breaking below the daily chart triangle support ahead of the weekend. Any break to a fresh 2023 high will likely defer to at least early April. The tiring weekly Stochastics is weighing on the still upsloping weekly MACD. I am looking at entering long in the green zone of the daily chart (in the ~1.61-1.72 range), targeting the red zone (of the daily chart in the ~1.82-1.90 range) for Thursday. The amber/yellow zone (in the ~1.50-1.60 range) is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

## TODAY'S TOP 3 TRADES

Jan 19, 2022

**METALS/ENERGY (NATURAL GAS, SILVER) + TODAY'S TOP TRADE (VIX)**  
**Natural Gas (NG)**

Natural Gas (NG) is trying to bounce off uptrend support (on the 4hr chart) in today's Asia morning, making progress in recovering after Thursday's strong profit-taking. Significantly, NG is extending Friday's rebound from just above the psychologically key 4 whole figure level, with the catalyst for testing triangle resistance (on the daily chart) coming as early as Thursday's highly anticipated weekly storage data. With NG comfortably above the 50% Fib retrace of the entire June 2020 to October 2021 rally (seen on tradingview.com on a monthly chart), NG appears unlikely to retest the December low the balance of January. Congratulations to Premium Members who benefited from the opportunities highlighted [Jan 27th](#) and [April 14th](#). The weekly, daily and 4hr RSI, Stochastics and MACD are bottomish, rallying or consolidating recent gains. I am looking to enter long in the green zone (of the daily chart), targeting the red zone for Tuesday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

### Weekly/Daily/4hr

**Today's Top 3 Trades** offers technical analysis on a subset of 3 CME/ICE commodity/index futures or spot FX markets (with coverage for 2 markets from a designated asset class(es) for each weekday as seen in the Watchlist), plus the top trade idea for the day from any asset class. All 3 markets covered are selected based on their likelihood to exhibit trend reversal or continuation during the week that begins on the day of coverage, based on technical analysis and news flow. For instance, Monday coverage is on 2 Agri (and potentially 1 Index), while Tuesdays are devoted to 2 Indices (and potentially 1 Soft).

Crypto Weekly Outlook offers technical Analysis for 10 coins from the top 50 in market cap that are most interesting for the coming week from a TA standpoint.

[Sample with Fundamental analysis on ETHUSD, BTCUSD and on the industry from Nov 28, 2021 right before a deepening in the crypto market correction.](#)

## CRYPTO WEEKLY OUTLOOK

ETHEREUM + INDUSTRY FUNDAMENTALS + BITCOIN + RIPPLE

### ETHEREUM (ETHUSD)

Nov 28, 2021

Ethereum (ETHUSD) is deepening in its correction, and appears poised to slide further this week. Significantly, ETHUSD is at high risk of exceeding the September pullback in magnitude, following in Bitcoin (BTCUSD)'s footsteps. The current 2 week downturn is testing the psychologically key 4k whole figure level, and appears to be gravitating towards an uptrend support line (on the weekly chart) connecting the July and September lows. Odds are elevated for a test of the 50% Fib retrace of the July to October rally sometime in December. ETHUSD's correlation to BTCUSD (on a weekly chart) is at 0.95, near the upper end of its 5 year range. [Congratulations to readers alerted August 1st of the completion of the major June-July bottom](#), and to those who heeded [the warning May 16th of the major top forming](#). The weekly RSI, Stochastics and MACD are tiring, weighing on the attempting to bottom daily RSI and Stochastics. I am likely going to remain flat this week but would consider going long in the 3000-3300 range, targeting a 3000-4000 range for December.
