

# TODAY'S TOP 3 TRADES

Mar 20, 2023

**AGRIS (WHEAT, SOYBEAN) + TODAY'S TOP TRADE (GBPAUD)**

## WHEAT (ZW)

Wheat (ZW) is consolidating near the psychologically key 700 whole figure level after bouncing off the 2023 low (formed a bit more than a week ago). Odds are moderate for a break of descending wedge resistance (on the weekly chart) before month end, which if successful, would neutralize the bear trend since the May high and dramatically increase the likelihood of ZW retesting the February high in the week after. The escalation in the Ukraine-Russia conflict deserves close monitoring. [Congratulations to Premium Members alerted Feb 14, 2022 to the looming resumption in the major uptrend and who benefited](#), along with those who took advantage of [the Aug 21, 2020 highlighting of ZW's major bottoming effort](#). The weekly and daily RSI, Stochastics and MACD are bottomish, rallying or consolidating recent gains. I am looking to go long in the green zone (of the daily chart), targeting the red zone for Friday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

## SOYBEAN (ZS)

Soybean (ZS) is trying to firm to start the week, but appears vulnerable to breaking to a fresh 2023 low. ZS' decisive slide last week back below uptrend support (on the weekly chart) suggests a deepening consolidation this week (from the 2023 high). Odds are suddenly moderate for a test of the psychologically key 1400 whole figure level by April sometime. The escalation in the Ukraine-Russia conflict deserves close monitoring. [Congratulations to Premium Members alerted Aug 24, 2020 to ZS remaining in play for a pending rally continuation](#) and to those warned of [the short opportunity Jun 14, 2021](#) and who benefited. The weekly and daily RSI, Stochastics and MACD are tiring or steadily sloping down. I am looking to enter short in the red zone (of the daily chart), targeting the green zone for Friday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

### Weekly/Daily/4hr

## GBPAUD

The GBPAUD is on the verge of completing in the next day or so, its triangle (on the 4hr chart), continuing a Bull Flag (seen more easily on the weekly and daily chart). A fresh 2023 high this week would dramatically increase the likelihood of testing the psychologically key 1.85 whole figure level by month end. Long term bullish momentum is building with the decisive break last week above a major downchannel resistance since March 2020 (as can be seen easier on a monthly chart on [tradingview.com](https://tradingview.com)). A bullish catalyst may arrive as early as Wednesday with the UK CPI, Thursday with the UK MPC official bank rate votes, monetary policy summary and official bank rate, or Friday after the UK flash manufacturing PMI, flash services PMI. The escalation in the Ukraine-Russia conflict deserves close monitoring. Congratulations to paying subscribers who benefited from the [Oct 4, 2022 analysis highlighting the high odds for a continued downtrend reversal going into year end](#). The weekly RSI, Stochastics and MACD are rallying or consolidating recent gains, but weighed by the daily MACD which is trying to negatively cross. I am looking to go long in the green zone (of the daily chart), targeting the red zone for Friday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

[Sample with Fundamental analysis on ETHUSD, BTCUSD and on the industry from Nov 28, 2021 right before a deepening in the crypto market correction.](#)

## CRYPTO WEEKLY OUTLOOK

ETHEREUM + INDUSTRY FUNDAMENTALS + BITCOIN + RIPPLE

### ETHEREUM (ETHUSD)

Nov 28, 2021

Ethereum (ETHUSD) is deepening in its correction, and appears poised to slide further this week. Significantly, ETHUSD is at high risk of exceeding the September pullback in magnitude, following in Bitcoin (BTCUSD)'s footsteps. The current 2 week downturn is testing the psychologically key 4k whole figure level, and appears to be gravitating towards an uptrend support line (on the weekly chart) connecting the July and September lows. Odds are elevated for a test of the 50% Fib retrace of the July to October rally sometime in December. ETHUSD's correlation to BTCUSD (on a weekly chart) is at 0.95, near the upper end of its 5 year range. [Congratulations to readers alerted August 1st of the completion of the major June-July bottom](#), and to those who heeded [the warning May 16th of the major top forming](#). The weekly RSI, Stochastics and MACD are tiring, weighing on the attempting to bottom daily RSI and Stochastics. I am likely going to remain flat this week but would consider going long in the 3000-3300 range, targeting a 3000-4000 range for December.

# COFFEE DAILY

Jan 2, 2022

## ROBUSTA COFFEE (RC)

Robusta Coffee (RC) edged lower Friday, closing 2021 just below the fresh year high. Significantly, with the new year beginning, odds are high after last year's strong bull market for RC to at least see a healthy correction. RC is bumping up against upchannel resistance (on the weekly chart), with some hesitation late last week as seen by the 2 consecutive daily Dojis. Any test of the psychologically key 2500 whole figure level will likely have to wait until at least Feb February. The weekly and daily RSI, Stochastics and MACD are rallying or consolidating recent gains. I am looking at entering long in the green zone of the daily chart (in the ~2270-2330 range), targeting the red zone (of the daily chart in the ~2400-2450 range) for Friday. The amber/yellow zone (in the ~2190-2240 range) is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).
