

TODAY'S TOP 3 TRADES

Apr 17, 2023

AGRIS (CORN, SOYBEAN) + TODAY'S TOP TRADE (NATURAL GAS)

CORN (ZC)

Corn (ZC) is testing symmetrical triangle resistance (on the weekly chart), with decent odds for reclaiming the 2023 high in April. Any break above ascending triangle resistance (on the 4hr chart) this week will dramatically reduce the likelihood of ZC sliding back before month end to triangle support (on the weekly chart). Nevertheless, the bigger picture (as can be seen more easily on a monthly chart on tradingview.com) is mixed, with ZC likely to remain within the 600-700 range the balance of April. [Congratulations to Premium Members who benefited from the May 28, 2020 alert to ZC's major bottoming effort](#) and again on [Aug 24, 2020](#). The weekly, daily and 4hr RSI, Stochastics and MACD are bottomish, rallying or consolidating recent gains. I am looking to go long in the green zone (of the daily chart), targeting the red zone for Friday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

SOYBEAN (ZS)

Soybean (ZS) is consolidating around the psychologically key 1500 whole figure level to start the week. Odds are now roughly equal for ZS to retest the 2023 high before month end as it is to test the 2023 low in the same period. The bigger picture (as can be seen more easily on a monthly chart on tradingview.com) is mixed, with ZS likely to remain within the 1400-1550 range the balance of April. [Congratulations to Premium Members alerted Aug 24, 2020 to ZS remaining in play for a pending rally continuation](#) and to those warned of [the short opportunity Jun 14, 2021](#) and who benefited. The weekly RSI, Stochastics and MACD are bottomish or consolidating, but weighed by the tiring daily Stochastics. I am looking to enter long in the green zone (of the daily chart), targeting the red zone for Friday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

Weekly/Daily/4hr

NATURAL GAS (NG)

Natural Gas (NG) gapped up to start the week, and is now testing downchannel resistance (on the 4hr chart) and descending wedge resistance (on the daily chart) after bouncing Friday off a fresh 2023 low. With NG having decisively reclaimed on Friday the psychologically key 2 whole figure level after briefly falling beneath it, further short covering appears likely ahead of the highly anticipated weekly storage Thursday. NG is trying to bounce off what is arguably downchannel support (on the weekly chart). Before bulls get excited, NG will need to reclaim the March high, which is unlikely before May. Congratulations to Premium Members who benefited from the opportunities highlighted [Jan 19, 2022](#), [Jan 27, 2021](#) and [April 14, 2021](#). The weekly, daily and 4hr RSI, Stochastics and MACD are bottomish or rallying. I am looking to enter long in the green zone (of the daily chart), targeting the red zone for Friday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

CRYPTO WEEKLY OUTLOOK

ETHEREUM + INDUSTRY FUNDAMENTALS + BITCOIN + RIPPLE

ETHEREUM (ETHUSD)

Nov 28, 2021

Ethereum (ETHUSD) is deepening in its correction, and appears poised to slide further this week. Significantly, ETHUSD is at high risk of exceeding the September pullback in magnitude, following in Bitcoin (BTCUSD)'s footsteps. The current 2 week downturn is testing the psychologically key 4k whole figure level, and appears to be gravitating towards an uptrend support line (on the weekly chart) connecting the July and September lows. Odds are elevated for a test of the 50% Fib retrace of the July to October rally sometime in December. ETHUSD's correlation to BTCUSD (on a weekly chart) is at 0.95, near the upper end of its 5 year range. [Congratulations to readers alerted August 1st of the completion of the major June-July bottom](#), and to those who heeded [the warning May 16th of the major top forming](#). The weekly RSI, Stochastics and MACD are tiring, weighing on the attempting to bottom daily RSI and Stochastics. I am likely going to remain flat this week but would consider going long in the 3000-3300 range, targeting a 3000-4000 range for December.

COFFEE DAILY

Jan 2, 2022

ROBUSTA COFFEE (RC)

Robusta Coffee (RC) edged lower Friday, closing 2021 just below the fresh year high. Significantly, with the new year beginning, odds are high after last year's strong bull market for RC to at least see a healthy correction. RC is bumping up against upchannel resistance (on the weekly chart), with some hesitation late last week as seen by the 2 consecutive daily Dojis. Any test of the psychologically key 2500 whole figure level will likely have to wait until at least Feb February. The weekly and daily RSI, Stochastics and MACD are rallying or consolidating recent gains. I am looking at entering long in the green zone of the daily chart (in the ~2270-2330 range), targeting the red zone (of the daily chart in the ~2400-2450 range) for Friday. The amber/yellow zone (in the ~2190-2240 range) is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).
