TODAY'S TOP 3 TRADES

April 19, 2023

METALS/ENERGY (NATURAL GAS, WTI CRUDE) + TODAY'S TOP TRADE (USDJPY) NATURAL GAS (NG)

Natural Gas (NG) is consolidating after decisively reclaiming the psychologically key 2 whole figure level after briefly falling beneath it last week. With NG having successfully bounced yesterday off just above downchannel resistance (on the 4hr chart), NG is gaining momentum on its rebound off last week's 2023 low and downchannel support (on the weekly chart). Further short covering may arrive as early as Thursday following the highly anticipated weekly storage. Before bulls get excited, NG will need to reclaim the March high, which is unlikely before May. Congratulations to Premium Members who benefited from the opportunities highlighted [Jan 19, 2022](#), [Jan 27, 2021](#) and [April 14, 2021](#). The weekly and daily RSI, Stochastics and MACD are bottomish, rallying or consolidating recent gains. I am looking to enter long in the green zone (of the daily chart), targeting the red zone for Tuesday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

Join the world's largest asset manager and 2 of the world's 5 largest (and 5 of the 10 largest) hedge funds by AUM as daily readers of [Tradable Patterns' technical analysis](#). As seen on Bloomberg, Refinitiv, Factset, Interactive Brokers, readers include global top 10 investment banks. **If you represent an institutional investor or potential distribution partner, write to info@tradablepatterns.com to request Bloomberg, Refinitiv and Factset readership reports.**

WTI CRUDE (CL)

WTI Crude (CL) is vulnerable to testing the psychologically key 80 whole figure level after Monday's break below uptrend support (that began late March and seen on the daily chart). Nevertheless, CL appears unlikely before month end to fill the gap up 2 Mondays ago. Initial support will likely kick in around downchannel resistance (on the weekly chart) and the 61.8% Fib retrace of the slide from the June 2022 high to the March low. [Congratulations to readers who heeded the August 4, 2021 warning of CL's vulnerability](#), and to [Premium Members who benefited from the bullish triangle breakout highlighted Nov 18, 2020](#). The weekly RSI, Stochastics and MACD are bottomish or consolidating recent gains, but weighed by the overbought daily Stochastics. I am looking at entering long in the green zone (of the daily chart), targeting the red zone for Tuesday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

Weekly/Daily/4hr

USDJPY

The USDJPY is edging higher, testing triangle resistance (on the weekly chart) and nearing the psychologically key 135 whole figure level. Given that the USDJPY has comfortably reclaimed its 38.2% Fib retrace of the Jan 2021 to Oct 2022 bull market (as can be seen on a monthly chart on tradingview.com), the USDJPY does not appear likely to retest the March low before month end. Bullish catalysts may arrive Thursday with the US unemployment claims, and Friday with the US flash manufacturing and services PMI. [Congratulations to Premium Members alerted Sep 24, 2021 to the completing of the consolidation since the July peak.](#) The weekly and daily RSI, Stochastics and MACD are bottomish, rallying or consolidating recent gains. I am long as of today and yesterday at 134.23, although if I were flat, I'd look to go long in the green zone (of the daily chart), targeting the red zone for Tuesday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

CRYPTO WEEKLY OUTLOOK

ETHEREUM + INDUSTRY FUNDAMENTALS + BITCOIN + RIPPLE

ETHEREUM (ETHUSD)

Nov 28, 2021

Ethereum (ETHUSD) is deepening in its correction, and appears poised to slide further this week. Significantly, ETHUSD is at high risk of exceeding the September pullback in magnitude, following in Bitcoin (BTCUSD)'s footsteps. The current 2 week downturn is testing the psychologically key 4k whole figure level, and appears to be gravitating towards an uptrend support line (on the weekly chart) connecting the July and September lows. Odds are elevated for a test of the 50% Fib retrace of the July to October rally sometime in December. ETHUSD's correlation to BTCUSD (on a weekly chart) is at 0.95, near the upper end of its 5 year range. [Congratulations to readers alerted August 1st of the completion of the major June-July bottom](#), and to those who heeded [the warning May 16th of the major top forming](#). The weekly RSI, Stochastics and MACD are tiring, weighing on the attempting to bottom daily RSI and Stochastics. I am likely going to remain flat this week but would consider going long in the 3000-3300 range, targeting a 3000-4000 range for December.

COFFEE DAILY

Jan 2, 2022

ROBUSTA COFFEE (RC)

Robusta Coffee (RC) edged lower Friday, closing 2021 just below the fresh year high. Significantly, with the new year beginning, odds are high after last year's strong bull market for RC to at least see a healthy correction. RC is bumping up against upchannel resistance (on the weekly chart), with some hesitation late last week as seen by the 2 consecutive daily Dojis. Any test of the psychologically key 2500 whole figure level will likely have to wait until at least Feb February. The weekly and daily RSI, Stochastics and MACD are rallying or consolidating recent gains. I am looking at entering long in the green zone of the daily chart (in the ~2270-2330 range), targeting the red zone (of the daily chart in the ~2400-2450 range) for Friday. The amber/yellow zone (in the ~2190-2240 range) is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).
