

COFFEE DAILY

Apr 20, 2023

ROBUSTA COFFEE (RC)

Robusta Coffee (RC) edged higher with a daily Doji yesterday, closing near Friday's fresh 2023 high just shy of the December 2021 high. A break above the April high before the weekend appears likely, and would dramatically increase the likelihood of a test of the upchannel resistance (on the 4hr chart) in the few days after. RC has completed a massive Bull Flag consolidation since late 2021 (seen easier on a monthly chart on tradingview.com), and is likely to test the 2011 high (formed in that March) by sometime in May. The weekly and daily RSI, Stochastics and MACD are rallying or consolidating recent gains. I am looking at entering long in the green zone of the daily chart (in the ~2270-2370 range), targeting the red zone (of the daily chart in the ~2420-2480 range) for Wednesday. The amber/yellow zone (in the ~2150-2250 range) is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

ARABICA COFFEE (KC)

Arabica Coffee (KC) slid more than 1% yesterday in its daily Doji after retesting the fresh 2023 high (formed Tuesday). Although further healthy profittaking is likely today after getting rejected yesterday at uptrend resistance (on the 4hr chart), KC isn't likely to fall below this week's low ahead of the weekend. A weekly close above the psychologically key 2 whole figure level would dramatically increase odds next week for renewed bullish momentum and a test of upchannel resistance (on the daily chart). The weekly RSI, Stochastics and MACD are rallying, but weighed by the overbought daily RSI and Stochastics. I am looking at entering long in the green zone of the daily chart (in the ~1.91-2.00 range), targeting the red zone (of the daily chart in the ~2.07-2.17 range) for Wednesday. The amber/yellow zone (in the ~1.82-1.90 range) is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

TODAY'S TOP 3 TRADES

Jan 19, 2022

METALS/ENERGY (NATURAL GAS, SILVER) + TODAY'S TOP TRADE (VIX)
Natural Gas (NG)

Natural Gas (NG) is trying to bounce off uptrend support (on the 4hr chart) in today's Asia morning, making progress in recovering after Thursday's strong profit-taking. Significantly, NG is extending Friday's rebound from just above the psychologically key 4 whole figure level, with the catalyst for testing triangle resistance (on the daily chart) coming as early as Thursday's highly anticipated weekly storage data. With NG comfortably above the 50% Fib retrace of the entire June 2020 to October 2021 rally (seen on tradingview.com on a monthly chart), NG appears unlikely to retest the December low the balance of January. Congratulations to Premium Members who benefited from the opportunities highlighted [Jan 27th](#) and [April 14th](#). The weekly, daily and 4hr RSI, Stochastics and MACD are bottomish, rallying or consolidating recent gains. I am looking to enter long in the green zone (of the daily chart), targeting the red zone for Tuesday. The amber/yellow zone is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

Weekly/Daily/4hr

Today's Top 3 Trades offers technical analysis on a subset of 3 CME/ICE commodity/index futures or spot FX markets (with coverage for 2 markets from a designated asset class(es) for each weekday as seen in the Watchlist), plus the top trade idea for the day from any asset class. All 3 markets covered are selected based on their likelihood to exhibit trend reversal or continuation during the week that begins on the day of coverage, based on technical analysis and news flow. For instance, Monday coverage is on 2 Agri's (and potentially 1 Index), while Tuesdays are devoted to 2 Indices (and potentially 1 Soft).

Crypto Weekly Outlook offers technical Analysis for 10 coins from the top 50 in market cap that are most interesting for the coming week from a TA standpoint.

[Sample with Fundamental analysis on ETHUSD, BTCUSD and on the industry from Nov 28, 2021 right before a deepening in the crypto market correction.](#)

CRYPTO WEEKLY OUTLOOK

ETHEREUM + INDUSTRY FUNDAMENTALS + BITCOIN + RIPPLE

ETHEREUM (ETHUSD)

Nov 28, 2021

Ethereum (ETHUSD) is deepening in its correction, and appears poised to slide further this week. Significantly, ETHUSD is at high risk of exceeding the September pullback in magnitude, following in Bitcoin (BTCUSD)'s footsteps. The current 2 week downturn is testing the psychologically key 4k whole figure level, and appears to be gravitating towards an uptrend support line (on the weekly chart) connecting the July and September lows. Odds are elevated for a test of the 50% Fib retrace of the July to October rally sometime in December. ETHUSD's correlation to BTCUSD (on a weekly chart) is at 0.95, near the upper end of its 5 year range. [Congratulations to readers alerted August 1st of the completion of the major June-July bottom](#), and to those who heeded [the warning May 16th of the major top forming](#). The weekly RSI, Stochastics and MACD are tiring, weighing on the attempting to bottom daily RSI and Stochastics. I am likely going to remain flat this week but would consider going long in the 3000-3300 range, targeting a 3000-4000 range for December.
