

# SUGAR DAILY

Dec 12, 2024

## LONDON WHITE SUGAR (W)

White sugar (W) edged higher with a daily Hammer yesterday (on the March contract), closing just shy of the 50% Fib retrace of the bounce off the 2024 low. Nevertheless, odds are low for a reclaiming of the psychologically key 600 whole figure level and March/September high by January sometime. The red December candle (as can be seen on a monthly continuous chart on [tradingview.com](http://tradingview.com)) is just above the 50% Fib retrace of the July 2019 to November 2023 bull market, with the continuous chart's 3 month MACD poised for a negative cross by January. Even so, odds are low for W to break below to a fresh 2024 low before year end. The monthly continuous chart MACD histogram is becoming less negative but weighed by the downsloping monthly MACD. The tiring weekly RSI, Stochastics and MACD are weighing on the bottomish daily RSI and Stochastics. I am looking at entering long in the green zone of the daily chart (in the ~523-533 range), targeting the red zone (of the daily chart in the ~540-548 range) for Wednesday. The amber/yellow zone (in the ~514-521 range) is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

## NEW YORK RAW SUGAR (SB)

Raw sugar (SB) rebounded more than 1% yesterday (on the March contract) and is now retesting the 38.2% Fib retrace of the bounce off the 2024 low. SB has completed a major bottom on the monthly continuous chart (as can be seen on [tradingview.com](https://tradingview.com)) with the monthly continuous MACD trying to positively cross. Any retest though of the psychologically key 25 whole figure level will have to defer until Q1 sometime. With the 3 month MACD tilting slightly down, odds are low for SB to retest its 2023 high by January sometime. The tiring weekly RSI, Stochastics and MACD are weighing on the bottomish daily equivalents. I am looking at entering long in the green zone of the daily chart (in the ~20.5-21 range), targeting the red zone (of the daily chart in the ~21.2-21.62 range) for Wednesday. The amber/yellow zone (in the ~20-20.4 range) is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

Looking for capital to trade? I've been trading through a fintech w/ a partner hedge fund that allocates to consistent traders who once completed on an initial demo MT5 account, are eligible for 90% of the P&L in live funded accounts. Each time you hit the 10% P&L objective (with no time limit assuming the maximum daily drawdown of 5% and maximum 10% total drawdown isn't hit), your initially funded account balance increments. Traders who reach the maximum funding of USD 1M w/ the 0/90 fee split, are subject to a newly negotiated fee for allocations exceeding USD 1M.

### CONGRATULATIONS!

You've passed Level 2. Now you can start Level 3 with \$30,000.00.

### 3) Hong Kong-Licensed Crypto Multi-Strat Quant

## USD Share Class: Absolute Return (Live Production)

#### Key features of the USD Share Class:

- Extracting alpha returns from digital assets to provide superior USD returns
- Our multi-strategy approach allows us to deliver all-weather, absolute returns. Each strategy has low correlation to each other, S&P500 and Bitcoin.
- Superior alternative to hedge funds trading traditional assets due to the high volatility of digital assets, and the 24/7 trading provides 5x more trading opportunities over a calendar year when compared to S&P 500.

Calendar Year Returns (Net of Fees) – AAA Shares Class - NAV

## BTC Share Class: Based on Existing Strategies

#### Key features of the BTC Share Class:

- Alpha returns on beta exposure to provide superior BTC/USD returns for investors seeking exposure to BTC
- Our strategies are carefully curated and customized to support generating returns in BTC, resulting in increased BTC balance
- Superior alternative to accumulate Bitcoin vs costly mining operations, staking with low yield, or CEFI lending, etc.
- Investors have option to switch to USD share class for absolute returns, optimizing exposures and taking profit from BTC, and switch back to the BTC share class when the cycle bottoms

Monthly Net Returns & ITD		Oct '23	Nov '23	Dec '23	Jan '24	Feb '24	Mar '24

#### Investment Objective

- Absolute return with managed volatility, seeking consistent incremental growth in capital.
- A robust risk-management approach, with an unrelenting focus on capital preservation. High liquidity and low exposure to systematic market risk.
- Access to best-in-class global fund managers specialising in digital currency-related strategies.
- Uncorrelated to other asset class.
- Targeted volatility of 15% p.a. with a targeted return of 35% p.a. net of fees. Past performance is not indicative nor a guarantee of future returns.

Building on successful track record in GCNF's first Vintage Fund, tracking a 4.7x TVPI in Agriculture, Carbon Project Development and BioFuels

### Expanded Scope for GCNF II to invest across 5 Verticals

- GCNF Core Thesis of increasing momentum for Decarbonisation businesses in the lead up to 2030 supported by COP29 having created much needed framework for removal specs.
- Rising investor demand, especially from Corporate VCs and global Infra PEs, for our Portfolio Companies and their Carbon streams, amidst overall challenging VC funding environment.
- Screening for financially robust businesses with industry-expert founders, we see an increasing number of VC opportunities in South Korea, where promising technologies go unnoticed internationally and are acquired cheaply by local Chaebols who integrate them into their main business.

Note: (1) Abu Dhabi's International Holding Company

Key Products	GP-Commit	Timing
<b>JetZero ("JZ") Continuation Vehicle</b> Long-term vehicle with like-minded capital partner to join us in supporting JZ's next growth chapter: Global Expansion. Compelling offering to acquire our strategic 10% stake in JZ with associated advisory board seat, allocation rights and first rights to capital injections at project level(s). Engaged investment bank to identify strategic capital with target first close of <b>US\$200mil</b> by Q4 2025 to participate in JZ Series-C.	US\$20mil	Q4 2025
<b>GCNF II</b> Second vintage of Greenium's flagship Venture Fund series, with strong performance in GCNF I. Actively monitoring existing pipeline and engaging with key prospects earmarked for GCNF I, allows us to seamlessly start building a Seed Portfolio. Expanding proven Core Thesis with Plastics & Digital Infrastructure. Expecting First Close with US\$20mil of external capital by Dec-2025. Target to have a Final close within 12 months from First Close for a total Fund Size of <b>US\$100mil</b> .	US\$10mil	Q2 2025
<b>Digital Infrastructure Ventures</b> Co-GP Arrangement with Rohin & David from SIF.VC with strong combined pipeline, founder network and complimentary expertise in Data Center Development & Tech. Besides investment rationale, there is a great opportunity for CHV to enhance its quantitative analysis, increase brand recognition in SEA's VC space and gain exposure to SIF's LP base of predominantly Corporate VCs. Target <b>US\$100mil</b> total Fund Size.	US\$10mil	Q2 2025
<b>Natural Capital</b> Revenue stacking model on underutilized farmland, unlocking lease income from Agriculture, Renewable Energy, Carbon coupled with strong historic Land Value Appreciation. ## COFFEE DAILY

Jun 13, 2023

### ROBUSTA COFFEE (RC)

Robusta Coffee (RC) pulled back another near 1% yesterday after briefly surging Friday to a fresh 2023 high and to slightly above the 2008 high (that March and seen easier on a monthly chart on [tradablepatterns.com](https://tradablepatterns.com)). RC is vulnerable to further profit-taking this week, where bulls will want to consolidate the massive rally from the 2023 low (at the start of the year) for at least the next few weeks or so. A break of the daily chart upchannel support would dramatically increase the likelihood of a slide below the weekly chart upchannel support in the few days after. Meanwhile, any challenge to the psychologically key 3000 whole figure level will have to wait until at least Q3. Longer term bulls are beginning to set their sights on the record high formed September 1994, although the probability of it being hit before year end is low. The weekly RSI, Stochastics and MACD are rallying or consolidating recent gains, but weighed on by the tring daily RSI and Stochastics. I am looking at entering long in the green zone of the daily chart (in the ~2540-2660 range), targeting the red zone (of the daily chart in the ~2710-2800 range) for Monday. The amber/yellow zone (in the ~2380-2510 range) is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

### ARABICA COFFEE (KC)

Arabica Coffee (KC) slid another 2.5% plus yesterday, closing back below downchannel resistance (on the daily chart). Although KC is back to near upchannel support (on the weekly chart), it remains moderately likely to test the psychologically key 2 whole figure level and the 2023 high (formed in April) before month end. Nevertheless, having reversed roughly half of the bounce off the June low, KC will now need more time to complete the major bottoming as can be seen easier on a monthly chart on [tradablepatterns.com](https://tradablepatterns.com). The weekly RSI, Stochastics and MACD are bottomish or consolidating. I am looking at entering long in the green zone of the daily chart (in the ~1.78-1.85 range), targeting the red zone (of the daily chart in the ~1.91-1.97 range) for Monday. The amber/yellow zone (in the ~1.68-1.75 range) is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

## COCOA DAILY

Jun 13, 2023

### LONDON COCOA (C)

London Cocoa (C) saw a bit of healthy profit-taking yesterday after forming a fresh 2023 intraday high. Although C still appears to be trending towards the psychologically key 2500 whole figure level and its 2016 high (formed in July and seen easier on a monthly chart on [tradingview.com](http://tradingview.com)). C is vulnerable to first consolidating the next week or so after bumping into upchannel resistance (on the daily and weekly chart). A test of the record high formed July 2010 is moderately likely by Q3 sometime. The weekly RSI, Stochastics and MACD are rallying or consolidating recent gains, but weighed on by the tiring daily RSI and Stochastics. I am looking at entering long in the green zone of the daily chart (in the ~2300-2380 range), targeting the red zone (of the daily chart in the ~2430-2500 range) for Monday. The amber/yellow zone (in the ~2200-2280 range) is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).

### NEW YORK COCOA (CC)

New York Cocoa (CC) slid more than 1% yesterday on healthy profit-taking after reaching a fresh 2023 high. Although CC appears to want to test its 2015 high (formed that December) sometime by Q3, CC is vulnerable the balance of this week to breaking the 4hr upchannel support, which would dramatically increase the odds of a deeper slide in the week after to upchannel support (on the daily and weekly chart). A break below the psychologically key 3k whole figure level before month end is moderately likely, but would merely be a correction within the major bull market off the September low, as can be seen easier on a monthly chart on [tradingview.com](http://tradingview.com). The still upsloping weekly MACD is being weighed on by the tiring weekly RSI and Stochastics. I am looking at entering long in the green zone of the daily chart (in the ~2950-3050 range), targeting the red zone (of the daily chart in the ~3140-3210 range) for Monday. The amber/yellow zone (in the ~2840-2930 range) is where I might place a stop if I was a swing trader (although in my personal account with which I seldom hold overnight I sometimes set my stops tighter).
